- 3. This Accusation is brought before the Board, under the authority of the following laws. All section references are to the Business and Professions Code unless otherwise indicated.

 - 5. Section 2234 of the Code, states:

"The board shall take action against any licensee who is charged with unprofessional conduct. In addition to other provisions of this article, unprofessional conduct includes, but is not limited to, the following:

"(b) Gross negligence.

CAUSE FOR DISCIPLINE

(Gross Negligence)

- 6. Respondent is subject to disciplinary action under Code section 2234, subdivision (b), in that he committed gross negligence during his care, treatment and management of Patient 11 from May 2012 until her death on June 2, 2013, of acute polypharmacy intoxication. The circumstances are as follows:
- 7. Patient 1 initially treated with Respondent, a specialist in sleep medicine, in January 2011, for chronic insomnia. At the time, Patient 1 was 40 years old. Her other medical conditions and complaints included: fibromyalgia and chronic pain due to fibromyalgia, restless limb/leg syndrome (RLS), and bipolar disorder. At her initial visit, Patient 1 reported being prescribed Ambien² for insomnia, Norco³ and Fentanyl⁴ for pain and Seroquel, Lexapro⁶ and Protonix. Respondent treated Patient 1 for insomnia recommending sleep hygiene, weight loss, comprehensive blood work and a sleep study.

² Ambien, the brand name for Zolpidem Tartrate, is a sedative hypnotic and a Schedule IV controlled substance pursuant to Health and Safety Code section 11057, subdivision (d)(32).

⁵ Seroquel, brand name for Quetiapine, is an anti-psychotic medication used to treat mood disorders, such as bipolar disorder and schizophrenia. Seroquel is also used to treat insomnia.

⁶ Lexapro, brand name for Escitalopram, is a selective serotonin reuptake inhibitor (SSRI) and is used to treat depression and anxiety.

⁷ Protonix, brand name for Pantoprazole, is used to treat certain stomach and esophagus problems, such as acid reflux.

¹ In order to protect the patient's privacy, the patient is identified in this charging pleading as Patient 1. The true name of the referenced patient is known to Respondent and will be disclosed to him upon his timely Request for Discovery.

³ Norco is the brand name for Hydrocodone Bitartrate and Acetaminophen. Hydrocodone is a Schedule II controlled substance pursuant to Health and Safety Code section 11055, subdivision (b)(1)(I)(i).

⁴ Fentanyl is an opioid analgesic used as the citrate salt in the induction and maintenance of anesthesia, as an adjunct to anesthesia, in combination with droperidol (or a similar agent) to induce neuroleptanalgesia, and in the management of chronic severe pain. It is 100-fold more potent than morphine and is a Schedule II controlled substance pursuant to Health and Safety Code section 11055, subdivision (b)(1)(I)(i).

- 8. At Patient 1's next visit, Respondent started her on Mirapex⁸ for the treatment of RLS, which can cause insomnia.
- 9. Patient 1 returned to Respondent on March 21, 2011. Patient 1 reported that her insomnia was not improved and Respondent referred her to cognitive behavioral therapy for insomnia. Respondent also substituted Ambien with Lorezepam⁹ for her insomnia due to her reports of associated anxiety.
- 10. Respondent next saw Patient 1 on June 21, 2011. Her insomnia and anxiety had not improved. Respondent restarted her on Ambien, in addition to the Lorezepam. Patient 1 had not participated in any cognitive behavior therapy and was again instructed to do so.
- 11. Patient 1 did not return to Respondent until March 20, 2012. In the interim, she reported having a gastric resection. She had not followed up with cognitive behavioral therapy for insomnia and her medication list then showed her as being prescribed: Restoril, ¹⁰ Ambien, Savella, ¹¹ Seroquel and Norco. Respondent discontinued the Restoril and started Patient 1 on Clonazepam. ¹²
- 12. Respondent saw Patient 1 again on April 24, 2012. She reported that her anxiety, depression and fatigue were worse. Respondent continued her on Clonazepam and started her on Horizant.¹³ Patient 1 continued to take Norco and Seroquel.
- 13. On May 24, 2012, Patient 1 returned to Respondent. At that time, she was taking Ambien, in addition to Norco, Clonazepam and Seroquel. Respondent stopped prescribing Horizant, due to minimal effect, and a prescription was placed for Xyrem.¹⁴

⁸ Mirapex, brand name for Pramipexole, is used to treat Parkinson's disease and RLS.

⁹ Lorazepam is a benzodiazepine and a Schedule IV controlled substance pursuant to Health and Safety Code section 11057, subdivision (d)(9).

¹⁰ Restoril, brand name for Temazepam, is a benzodiazepine and is a Schedule IV controlled substance pursuant to Health and Safety Code section 11057, subdivision (d)(29).

11 Savella, a selective serotonin and norepinephrine reuptake inhibitor (SNRI) is used to

treat fibromyalgia.

12 Clonazepam, generic for Klonopin, is a benzodiazepine and a Schedule IV controlled substance pursuant to Health and Safety Code section 11057, subdivision (d)(7).

Horizant is used to treat RLS.
 Xyrem, brand name for Sodium Oxybate, is used to treat narcolepsy and is a Schedule III controlled substance.

- 14. Patient 1's health insurance company denied Respondent's request for authorization for the prescription of Xyrem for the "off label" use of insomnia. Respondent then submitted an appeal and the prescription was approved. Respondent claims Patient 1 was extensively counseled regarding the risks of Xyrem, in particular in combination with her psychotropic, hypnotic and narcotic medications.
- 15. In a letter dated August 7, 2012, from the pharmacy distributing Xyrem to Respondent, the pharmacy raised concerns that Patient 1 was also taking Ambien, which is contraindicated, and Norco, Seroquel and Klonopin (Clonazepam), in conjunction with Xyrem.
- 16. Patient 1 continued on Norco, Clonazepam, Seroquel and Xyrem until December 12, 2012, when Patient 1 switched insurance companies and her new carrier denied her prescription for Xyrem. Again, Respondent appealed the denial and the prescription was subsequently approved.
- 17. Respondent continued to treat and prescribe to Patient 1 up until her final visit on May 14, 2013. At that time, Patient 1 was taking Xyrem, Clonazapam, Norco and Seroquel. Patient 1 reported sleeping through the night, but that she was fatigued and depressed.
- 18. On June 2, 2013, Patient 1 passed away from acute polypharmacy intoxication (drug overdose) with Norco and Ambien listed as the cause of death.
 - 19. On June 12, 2013, Respondent prescribed Patient 1 Xyrem.
- 20. According to the standard of care within the medical community, prescribing Xyrem is contraindicated in a patient who is also taking sedative hypnotics/central nervous system depressants.
- 21. Respondent committed an extreme departure of care, and, thus, gross negligence, when he prescribed Xyrem to Patient 1 who was taking numerous other sedative hypnotics at the time, including Clonazapem, Seroquel, and Norco.
