Respondent shall immediately inform the Board or its designee, in writing, of travel to any areas outside the jurisdiction of California which lasts, or is contemplated to last, more than thirty (30) calendar days.

General Probation Requirements; Quarterly Declarations; Abstain from the Use of Alcohol and/or
Controlled Substances; and Biological Fluid Testing.

- 14. <u>VIOLATION OF PROBATION</u>. Failure to fully comply with any term or condition of probation is a violation of probation. If Respondent violates probation in any respect, the Board, after giving Respondent notice and the opportunity to be heard, may revoke probation and carry out the disciplinary order that was stayed. If an Accusation, or Petition to Revoke Probation, or an Interim Suspension Order is filed against Respondent during probation, the Board shall have continuing jurisdiction until the matter is final, and the period of probation shall be extended until the matter is final.
- 15. <u>LICENSE SURRENDER</u>. Following the effective date of this Decision, if
  Respondent ceases practicing due to retirement or health reasons or is otherwise unable to satisfy

the terms and conditions of probation, Respondent may request to surrender his or her license. The Board reserves the right to evaluate Respondent's request and to exercise its discretion in determining whether or not to grant the request, or to take any other action deemed appropriate and reasonable under the circumstances. Upon formal acceptance of the surrender, Respondent shall within 15 calendar days deliver Respondent's wallet and wall certificate to the Board or its designee and Respondent shall no longer practice medicine. Respondent will no longer be subject to the terms and conditions of probation. If Respondent re-applies for a medical license, the application shall be treated as a petition for reinstatement of a revoked certificate.

16. <u>PROBATION MONITORING COSTS</u>. Respondent shall pay the costs associated with probation monitoring each and every year of probation, as designated by the Board, which may be adjusted on an annual basis. Such costs shall be payable to the Medical Board of California and delivered to the Board or its designee no later than January 31 of each calendar year.

## FIRST CAUSE FOR DISCIPLINE

## (Gross Negligence)

14. Respondent Kourosh Parsapour, M.D. is subject to disciplinary action under section 2234, subdivision (b), in that he was grossly negligent in his care and treatment of fictitious patient, "Patient M.P" and Patient 2.1 The circumstances are as follows:

## Background

- 15. Respondent is the owner of Weedrees.com, which began providing marijuana recommendations using an online format in approximately November 2016.
- 16. To be considered for a marijuana recommendation using Weedrees.com, a patient would fill out and submit an online health questionnaire, which operated as a screening tool. According to Respondent, the questionnaire would then be evaluated. In some, but not all, instances, a phone call to the patient was placed and/or a video conference would be completed. If the patient received approval for a medical marijuana recommendation, the medical recommendation certificate would be provided.

#### Standard of Care

17. The standard of care for recommending medical marijuana is the same for recommending or prescribing the use of any other medication. The standard of care for

Patient 2 is referred to by number to protect his privacy. To the extent Respondent is not already aware of Patient 2's identity, that information will be disclosed in discovery.

recommending medical marijuana includes providing the recommendation only when it is clinically indicated and only as part of a rational treatment plan that has specific, identifiable goals. All aspects of the process of evaluation and management that support the decision to recommend medical marijuana must be documented. The fundamental standard of practice for all medical care, including the recommendation of marijuana, is to obtain a history and physical examination sufficient to reach a valid clinical conclusion, develop a treatment plan to address the problems at hand, implement the plan, change it as necessary, and document the process in sufficient detail such that a physician with similar training and experience would be able to understand the entirety of the care provided. The standard of care requires obtaining informed consent, advising the patient of the potential benefits and risks of the proposed treatment, soliciting and answering questions, and ascertaining that the patient understands the relevant risks and benefits, and consents to accept the risks in order to obtain the benefits of the proposed treatment. Although the standard of care does not require a physician to perform a detailed background check to verify the identity of a patient, it does require a physician to look at the patient and determine identity to a reasonable degree of certainty.

18. The standard of care in using telehealth technologies requires that patient consent be obtained and documented. The standards of practice for telehealth are the same as the standards of practice for face-to-face medicine. Telehealth may be used when it can adequately address the problem under evaluation. It may not be used when there is a need for physical actions that cannot be accomplished through its use.

#### Patient M.P.

19. On November 16, 2017, Investigator E.C., of the Department of Consumer Affairs, Health Quality Investigations Unit, posing as patient M.P., visited <a href="https://www.weedrecs.com">www.weedrecs.com</a> and submitted a request for a marijuana recommendation. Patient M.P. provided a location for mailing the recommendation, a cell phone number, and a credit card. Patient M.P. uploaded a driver's license bearing identifying information for the fictitious patient.

Do you smoke cigarettes? Answer provided: Sometimes.

Do you drink alcohol?

Answer provided: On social occasions.

Do you have medical files or records of your care that you would like to share with the doctor?

Answer provided: No.

- 21. The questionnaire ended with a statement that read, "Thanks for taking the time to complete this questionnaire, [M.P.] A doctor will attend to your case as soon as possible. The doctor will NOT call everyone back. If the doctor has any questions, you'll be contacted right away..."
- 22. On November 16, 2017, at 10:33 a.m., Investigator E.C. received a text message from Respondent welcoming Patient M.P. to SMS notification. At 11:13 a.m., Investigator E.C. received a second text message advising that Patient M.P. had been approved for medical cannabis, followed by an emailed PDF of the medical marijuana certificate.
  - 23. Patients can upload medical records; however, Patient M.P. did not do so.
- 24. Respondent's patient note indicates the patient is a 50-year-old male, without past medical history, presenting with an over five-year history of migraine headaches, with symptoms occurring weekly. The patient has self-medicated with cannabis with "plus or minus" relief. The review of systems is negative for mental health disorders, there are no known drug allergies, the family history is negative for schizophrenia. Patient M.P. is not in school and is not a primary caregiver for children. He occasionally uses tobacco, and uses alcohol socially. The assessment and plan is intractable migraines and a low-risk patient. Cannabis is recommended for symptomatic analgesia to be titrated to effect.
  - 25. No informed consent for the medical marijuana recommendation was obtained.
  - 26. Respondent neither called Patient M.P. nor engaged in a video conference.
  - 27. Respondent believed the case to be a "slam dunk" case of "explicit need."
- 28. Respondent was grossly negligent in the care and treatment of Patient M.P. as follows:

 a. Respondent failed to identify Patient M.P. to a reasonable degree of certainty.

b. Respondent failed to document a thorough history in sufficient detail to support the diagnosis of chronic stable migraine and exclude the presence of other, more serious pathology.

- c. Respondent failed to perform a physical examination, including failing to assess vital signs and perform an examination of the head, neck, and neurological systems in the course of evaluation of a patient with intermittent severe headache.
