FACTUAL ALLEGATIONS

12. On August 7, 2019 the Board received a mandatory Health Facility / Peer Review report form, as required by the provisions of Business and Professions Code section 805 et seq., which stated that on July 29, 2019, Facey Medical Group (Facey) voted to terminate Respondent's privileges. The termination was prompted by Facey's investigation of a complaint submitted by Patient 2. Respondent resigned his privileges on or about August 2, 2019, before he was formally notified of the termination of his privileges. The Board's subsequent investigation revealed that the termination of Respondent's privileges related to his interactions with three patients.

Patient 1¹

13. Patient 1, a male, who was 47-years-old at the time, was seen by Respondent on several occasions. His final visit was on October 2, 2013. Respondent saw Patient 1 for a physical exam on that date. During the exam, while lying down on the examination bed, Respondent palpated Patient 1 near his waist. Respondent then pulled down Patient 1's pants and underwear, placed his mouth on Patient 1's penis and orally copulated Patient 1. Patient 1 was alarmed and pushed Respondent away from him, yelling in Spanish: "What are you doing!" Respondent told Patient 1 that this is how he was examining him, while moving toward Patient 1 in an apparent attempt to orally copulate Patient 1 a second time. Patient 1 pushed Respondent away, got off the examining table and walked out of the examining room. Patient 1 then informed the front office staff about what happened. Patient 1 did not return to see Respondent.

14. Patient 1 was contacted and interviewed, approximately in September, 2015, by Facey staff who asked to meet with him at their office located on Rinaldi Street in Mission Hills. During the meeting, an unidentified member of Facey Staff explained to Patient 1 that the exam conducted by Respondent was done improperly. Patient 1 felt satisfied with the information provided to him by the staff and due to his embarrassment, he did not pursue the matter further.

¹ Patients are designated by number for privacy reasons. Respondent is aware of the patients' names. Patient names will be disclosed to Respondent upon a written Request for Discovery.

Patient 2

15. Patient 2, a male, who was approximately 25-years-old at the time was seen by Respondent on several occasions, the last two times being on March 22, 2019 and on May 28, 2019.

16. Respondent performed a history and physical examination of Patient 2, on or about March 22, 2019, at which time the patient was concerned about unintended weight loss of about 15 pounds during the previous four months. There was no reported positivity for STD's with the patient or his partners. Respondent ordered laboratory screening for Patient 2 to rule out HIV and other sexually transmitted diseases, thyroid abnormalities, anemia and diabetes. He recommended that Patient 2 increase his intake of protein and return for a more complete follow up.

17. After Patient 2's laboratory test results were reported as normal, Patient 2 returned to see Respondent on May 28, 2019. During the appointment, Respondent behaved in a manner that made Patient 2 feel physically violated and distraught.

18. Respondent's examination of Patient 2 on May 28, 2019 was very intrusive and performed without appropriate explanation and documentation. There was no informed consent for the intrusive examinations performed. No chaperone was present or offered to Patient 2.

19. During the visit on May 28, 2019, Respondent rubbed Patient 2's knee and shoulder in a suggestive manner while speaking to him. Respondent instructed Patient 2 to change into a gown for the physical examination. During the physical examination, as Respondent was using his stethoscope to listen to Patient 2's chest, Respondent was standing directly in front of Patient 2, who was seated on the examination table. Respondent rubbed his genitals against Patient 2's knees. Patient 2 felt that Respondent developed an erection as he was rubbing his genitals against Patient 2's knees.

20. Respondent then instructed Patient 2 to lay down on the examination table, face up. Respondent folded Patient 2's gown below the patient's pelvic area and examined Patient 2's abdomen and genital areas. Without wearing gloves, Respondent pressed on the base of Patient 2's penis and inguinal areas. Respondent examined Patient 2's testicles while he was laying

1 down. Patient 2 described this exam: "He was examining my penis and testicles in a way I've
2 never had before and pulling it and to the point of a fondle."

3 21. Respondent stated in his interview with the Board's investigators that the exam of
4 Patient 2 was concerning because he felt "extensive amounts of lymph nodes" and that he
5 observed two small circular scaly-red superficial lesions or abrasions on the mid to proximal shaft
6 of the patient's penis. Respondent, however, did not document observing any lesions on the
7 patient's genitals in Patient 2's medical record. Respondent also stated that he did not wear
8 gloves during this part of examination because "you can't percuss with your gloves on. And you
9 lose the tactile sensation with gloves on as well."

10 22. Respondent then had Patient 2 stand up for a further genital exam. As to this
11 examination, Patient 2 described that Respondent, after putting on examination gloves, was
12 stroking, pulling on his penis and fondling it.

13 23. During his interview with the Board's investigators, Respondent stated that in
14 examining Patient 2's penis while the patient was standing up, he "attempted to milk the penis
15 because of concerns for looking for STDs or discharge."

16 24. Respondent then instructed Patient 2 to bend over, and after Patient 2 complied,
17 Respondent conducted a rectal exam of Patient 2 without prior explanation of what he was about
18 to do.

19 25. As Patient 2 was leaving, he realized that Respondent forgot to remove a wart on
20 Patient 2's finger or hand. He returned and was taken to Respondent's office, where the wart was
21 treated. Patient 2 felt that Respondent spoke with him in a flirtatious and suggestive manner.
22 Respondent failed to document this second part of the patient encounter.

23 26. After the visit with Respondent, Patient 2 felt violated and emotionally distraught.
24 He wrote a letter to Respondent with a copy to Facey, dated on or about June 10, 2019. The letter
25 stated:

26 ///

1 "Good Afternoon Dr. Castillo,

2 I am writing you to let you know how uncomfortable I was left feeling after our
3 appointment on Tuesday May 28th, 2019. Since leaving, I have been going back and
4 forth in my head whether or not I should speak out about it, and have much regret that I
5 did not stand up for myself during the incidents. I felt that you were quite touchy and over
6 the top with me, especially for a normal physical exam, an exam that I have been
7 receiving routinely my entire life, and have never left feeling even remotely close to what
8 I am feeling now. I am unaware of your sexual preference, and would be the last person
9 to care. However, while examining me I felt it was completely unnecessary to do a
10 number of things in which you did. Things that in the moment, made me feel
11 uncomfortable, and while looking back at them, make me feel even more uneasy. I
12 believe people let these things happen in the moment because they place their trust in
13 people who hold the title of such a prestigious profession. However, you were doing
14 exams such a chest exam and were clearly pressing your genitals up against my leg and
15 knee area. I felt that this was an exam well in arms reach and did not require you to be
16 anywhere remotely that close to me to perform. The constant placing your hand on my
17 knee and shoulder. The ungloved examination of my genitals while I was lying on my
18 back. Which again, never in my 25 years has a doctor performed a genital check on me
19 whilst I lay on the table. This type of exam has only happened while the doctor has
20 protected his/her hands with gloves, and I am standing in the upright position.
21 Immediately following, when I did arise into the upright position, you did a second
22 examination of my genitals and stayed in the penile region for what I, and any average
23 reasonable person would have considered to be uncomfortably long. This uncomfortable
24 exam was followed by another one where you examined my prostate anally. Yet another
25 exam with which I have never received at a physical, or heard of being part of procedure
26 for a 25 year old male. Based on this unexpected exam, you were quick to prescribe
27 antibiotics, a prescription that I did not fill because of your lack of confidence and overall
28 hesitation in diagnosis.

17 Mentally, I did not necessarily know how to compartmentalize all of this, because
18 I have never experienced it. Upon leaving, I came back to reception to get my wart on my
19 finger frozen off, they mentioned you were busy. I met you in the hallway, and you
20 agreed to take me back into a patient room to proceed with the freezing of the wart. You
21 brought me into your office instead and shut the door. Again, putting your hand on my
22 shoulder and knee numerous times. A friendly gesture or not, it made me noticeably
23 uncomfortable. I made the follow up appointment with you to see if any of this would take
24 place again, but can not let this sit on my mind any longer. I am contacting you today to
25 inform you that 1. I will certainly not be at our follow up appointment on July 9th and will
26 not be continuing with you as my General Practitioner, and 2. I will be notifying Facey
27 Human Resources to let them know of the instances that have left me uncomfortable. I do
28 not wish any ill harm to you or your career, but do feel that you have an integral and
ethical obligation to uphold as a doctor. If this commitment can not be honored by you,
then I hope me coming forward serves as prevention of no other person; Man, Woman, or
Child leaves your office feeling the way I did.

26 Your former patient,

Patient 3

27. On or about August 28, 2019, after Respondent's privileges at Facey were already surrendered and the Board's investigation was ongoing, Facey contacted Medical Board investigators and informed them that they were made aware of another recent complaint against Respondent. The nature of the complaint was that Patient 3, a 19-year-old male, saw Respondent for a physical examination and felt that the exam was "off" or "weird." Patient 3 did not want to continue seeing or have any follow up appointments with Respondent. Patient 3 changed doctors and mentioned his concerns regarding Respondent to the new physician. A Facey peer review subcommittee met with Patient 3 and interviewed him. Their interview and the Board's subsequent investigation revealed the following:

28. Patient 3 saw Respondent on June 4, 2019, at approximately noon, for a routine physical examination. It was his first visit at Facey.

29. After meeting with Respondent and having the initial discussion of reason for visit for a routine physical examination, Respondent told Patient 3 to take his clothes off, including his underwear, and change into a gown, but to leave his socks on. Respondent stepped out while Patient 3 changed.

30. Respondent performed his physical examination with Patient 3 initially sitting on the examination table. The physical exam included a heart and lungs exam with the stethoscope. Respondent then used his hands to touch Patient 3's chest at which time he stroked Patient 3's nipples. Respondent then had Patient 3 get up and stand on the floor for the genital examination. Respondent did not put on gloves. Respondent touched Patient 3's penis for some time. Patient 3 described the examination as Respondent stroking his penis. Patient 3 found it strange that Respondent examined his penis at all, as this had not happened before with other physical exams, and Patient 3 had not expressed any complaints with regard to his genitals during this visit. Respondent asked Patient 3 if he has sex with boys and Patient 3 answered in the affirmative. Patient 3 also told Respondent that he has had several sexual partners and has had unprotected sex with them. Respondent asked Patient 3 if he masturbated, to which the patient also answered in the affirmative. Respondent also performed a testicular exam and had Patient 3 turn his head and

1 cough to each side. Respondent did not wear gloves during any part of the genital examination.
2 Patient 3 also felt Respondent was aroused during the clinical examination and that Respondent
3 had an erection.

4 31. When Respondent was done with the examination, Respondent confirmed that
5 Patient 3's phone number was still the same as the number in Patient 3's chart information.
6 Respondent asked Patient 3 if he would come to his house in Van Nuys. Patient 3 told
7 Respondent that he had a test at school that day and could not. Respondent advised Patient 3 to
8 make a follow up appointment, and referred him to the lab.

9 32. Respondent sent a text message to Patient 3 at approximately 1:00 pm on June 4,
10 2019, to confirm that he had the correct number, and saying that it was nice to meet him. The
11 patient texted back: "...it's was nice to meeting you too. Thanks for that my dick it was so
12 happy. I can't wait to see you tonight." Patient 3 informed Respondent that he was going to get
13 out of school at 6:20 p.m. He asked: "Do you want to have sex with me only one time? Or do
14 you want have sex with me more then once." Respondent replied by text message: "Let's meet
15 today and see how things go but I have a feeling I'm gonna want to do it again."

16 33. Respondent, driving his vehicle, picked up Patient 3 from Golden Oak Adult
17 School, and together they went to Patient 3's apartment. Respondent went into the patient's
18 apartment where the two of them engaged in sexual activity, which included touching as
19 described in Section 243.4 of the Penal Code.
