3 conduct. In addition to other provisions of this article, unprofessional conduct includes, but is not
4 limited to, the following:

5 “(a) Violating or attempting to violate, directly or indirectly, assisting in or abetting the
6 violation of, or conspiring to violate any provision of this chapter.

7 “(b) Gross negligence.

28 who is the subject of an investigation by the board.”

1
2 6. Section 2266 of the Code states: "The failure of a physician and surgeon to maintain
3 adequate and accurate records relating to the provision of services to their patients constitutes
4 unprofessional conduct."

5 **FIRST CAUSE FOR DISCIPLINE**

6 **(Repeated Negligent Acts)**

7 7. Respondent has subjected his Physician's and Surgeon's License No. A 61907 to
8 disciplinary action, as defined by section 2234, subdivision (c), in that he engaged in repeated
9 negligent acts in the care and treatment of Patient A, Patient B, Patient C, Patient D, and Patient
10 E. The circumstances are as follows:

11 8. At all times relevant to this pleading, Respondent worked as a physician for the
12 California Correctional Health Services treating patients who were inmates at the California
13 Department of Corrections and Rehabilitation. Respondent treated patients at a Yard Clinic or a
14 Triage and Treatment Area (TTA) within the prison. Patients treated at the yard clinic were able
15 to request a scheduled appointment with a physician, or drop in if an appointment was available.
16 Patients treated at the TTA were processed in a manner similar to an urgent care clinic. The TTA
17 was open 24-hours a day and served critical care patients on an as needed basis.

18 Patient A¹

19 9. On or about November 16, 2015, Patient A presented to Respondent complaining of
20 occasional pains that were causing him difficulty in carrying out his daily activities. Patient A's
21 history included a discectomy in 2010, and a diagnosis of degenerative joint disease of the
22 Lumbar-Sacral spine. Patient A was currently prescribed Morphine Extended Release 30 mg,
23 twice daily. Respondent documented that Patient A's neurological assessment was positive for
24 lower left weakness in his extremities. Respondent refilled Patient A's prescription for Morphine
25 for 90 days, prescribed the anti-convulsant medication Oxcarbazepine, and recommended a return
26 visit in three months.

27
28 ¹ Patients are referred to by letter to protect their privacy.

1 10. Respondent did not document a physical assessment relating to Patient A's presenting
2 complaint of pain. Respondent failed to document key physical findings relating to the presence
3 or absence of reflexes including whether the weakness was distal or proximal, whether the
4 weakness was mild, moderate or severe, or whether there were other neurological deficits that
5 required additional examination. Respondent failed to document a treatment plan or any
6 objectives related to the continued prescriptions of opiates. Respondent failed to document a
7 treatment plan, or consider any additional referrals or evaluations for Patient A's complaint of
8 pain. In an interview with investigators, Respondent admitted that he did not document any
9 additional neurologic findings. Respondent stated that the TTA was not staffed adequately and
10 time was a big problem.

11 Patient B

12 11. On or about October 6, 2015, Patient B presented to Respondent with a history of a
13 right knee ACL reconstruction that occurred on September 25, 2015. Patient B presented in a
14 long leg cast and had no complaints.

15 12. On or about November 23, 2015, Patient B presented to Respondent requesting help
16 in returning his wheelchair. Respondent discontinued the order for a wheelchair, and ordered
17 crutches and pain medication. Respondent did not examine Patient B's knee, or document what
18 level of weight bearing Patient B should perform. Patient B had received treatment in physical
19 therapy that documented his progress and weight bearing ability, but Respondent failed to
20 reference it in his physical assessment or document that he reviewed the physical therapy records.
21 In an interview with investigators, Respondent admitted that he did not examine Patient B's knee.

22 Patient C

23 13. On or about October 29, 2015, Patient C presented to Respondent with back pain
24 resulting from a lumbar compression fracture.

25 14. On or about November 19, 2015, Patient C presented to Respondent at the Yard
26 Clinic for an appointment to discuss a special diet or medication to help with his Irritable Bowel
27 Syndrome (IBS). Patient C presented with a history that included a lumbar compression fracture
28 and IBS. Respondent performed and documented a heart and lung examination, but did not

1 perform an examination of Patient C's abdomen. Respondent did not ask questions of Patient C
2 to elicit additional information related to his complaint of IBS. Respondent failed to perform
3 and/or document an assessment and plan related to Patient C's history of IBS. In an interview
4 with investigators, Respondent admitted that he did not perform an abdominal examination of
5 Patient C.

6 15. On or about January 19, 2016, Patient C presented to Respondent complaining of
7 continued back pain. Respondent documented Patient C's history of a lumbar compression
8 fracture and characterized it as stable. Respondent failed to perform and/or document an adequate
9 musculoskeletal examination related to Patient C's complaint of back pain. Respondent
10 documented that a musculoskeletal and neurological examination was performed, but only wrote
11 that it was within normal limits without adding any specific findings or observations.

12 Patient D

13 16. On or about November 18, 2015, Patient D presented to Respondent complaining of
14 blurry vision and continued left hip pain. Patient D had a history of hypertension, diabetes, and
15 dyslipidemia. Respondent documented that the eye examination and physical examination were
16 within normal limits. Despite Patient D's history of diabetes and complaint of blurred vision,
17 Respondent failed to document adequate specific findings of the eye examination. In an
18 interview with investigators, Respondent stated that he recalls examining Patient D's eyes, but it
19 "wasn't the best documentation."

20 17. On or about January 25, 2016, Patient D returned to Respondent complaining of
21 increasing left hip pain. Rather than documenting specific findings of the musculoskeletal
22 examination, Respondent only wrote that the results were within normal limits.

23 Patient E

24 18. On or about November 9, 2015, Patient E presented to Respondent for a follow up
25 visit related to a prior biopsy of an eyebrow lesion from October 30, 2015, and requesting pain
26 medication for chronic pain in his right shoulder. Respondent did not have the biopsy results
27 available at this visit. Respondent prescribed him ibuprofen for his pain and advised him to
28 return for his biopsy results in the future. Respondent did not contact the pathology lab to obtain

1 the biopsy results, or direct another staff member to do so on his behalf. Respondent failed to
2 document Patient E's pain symptoms or conduct a physical examination of his shoulder. In an
3 interview with investigators, Respondent stated that he probably should have examined Patient
4 E's shoulder, but "time was probably of essence."

5 19. On or about November 19, 2015, Patient E returned to Respondent to obtain the
6 results of his prior biopsy. Patient E's biopsy results were still unavailable. Respondent stated
7 that he called the specialty clinic, and directed his nurse to call the specialty clinic to follow up on
8 the missing biopsy results, but failed to document this in the medical records. In an interview
9 with investigators, Respondent admitted that he did not attempt to call the pathology lab to obtain
10 the biopsy results.

11 STANDARD OF CARE

12 20. The standard of care is to perform an adequate history and physical assessment based
13 on a patient's complaint. A physician should conduct an adequate history and physical, and
14 document an assessment and plan of action to address the patient's complaint.

15 21. The standard of care for pain management requires that a physician and surgeon
16 perform an adequate history and physical examination. A physician should document a treatment
17 plan that identifies specific objectives, by which the plan can assess pain relief, improved
18 physical or psychosocial function. A physician should evaluate progress towards treatment
19 objectives when determining whether to continue treatment by opiate medications. The treating
20 physician should consider referring the patient for additional evaluation and treatment as
21 indicated, in order to further the objectives of the treatment plan.

22 22. The standard of care in treating a patient after an ACL reconstruction requires that the
23 physician perform a knee examination. The physician should know when and how the patient
24 should begin ambulation after surgery. The physician should review and consider the
25 recommendations made by the surgeon of record, and adhere to the physical therapy
26 recommendations.

27 23. The standard of care after a biopsy requires the physician to report the biopsy results
28 to the patient in a timely manner. If the biopsy results are unavailable, the physician should

1 follow up on the missing results and document efforts to obtain the results in the patient's medical
2 record.

3 DEPARTURES

4 Patient A

5 24. Respondent failed to perform and/or document an adequate history and physical
6 assessment relating to Patient A's complaint, which constitutes a departure from the standard of
7 care.

8 25. Respondent failed to perform and/or document an adequate pain management history
9 and physical assessment of Patient A, which constitutes a departure from the standard of care.

10 Patient B

11 26. Respondent failed to perform and/or document an adequate knee examination of
12 Patient B, which constitutes a departure from the standard of care.

13 27. Respondent lacked knowledge and/or failed to document when and to what extent
14 Patient B should begin bearing weight on his knee after ACL reconstruction surgery, which
15 constitutes a departure from the standard of care.

16 Patient C

17 28. Respondent failed to perform and/or document an adequate history and physical
18 examination related to Patient C's IBS, which constitutes a departure from the standard of care.

19 29. Respondent failed to document an adequate history and physical examination related
20 to Patient C's complaint of back pain, which constitutes a departure from the standard of care.

21 Patient D

22 30. Respondent failed to adequately document the physical findings of Patient D's eye
23 exam, which constitutes a departure from the standard of care.

24 31. Respondent failed to adequately document the physical findings of Patient D's
25 musculoskeletal examination, which constitutes a departure from the standard of care.

26 ///

27 ///

28 ///

Patient E

32. Respondent failed to provide Patient E with the results of his biopsy in a timely manner, which constitutes a departure from the standard of care.

33. Respondent failed to perform a history and physical examination of Patient E's complaint of shoulder pain, which constitutes a departure from the standard of care.

SECOND CAUSE FOR DISCIPLINE

(Failure to Maintain Adequate and Accurate Medical Records)

34. Respondent has subjected his Physician's and Surgeon's License No. A 61907 to disciplinary action, as defined by section 2266, in that he failed to maintain adequate and accurate records relating to the provision of services to Patient A, Patient B, Patient C, Patient D, and Patient E. The circumstances are more particularly alleged in paragraphs 8 through 19, which are hereby incorporated by reference and realleged as if fully set forth herein.

PRAYER

WHEREFORE, Complainant requests that a hearing be held on the matters herein alleged, and that following the hearing, the Medical Board of California issue a decision:
