FIRST CAUSE FOR DISCIPLINE

(Prescribing or Administering a Controlled Substances to Himself)

18. Respondent has subjected his Physician's and Surgeon's Certificate No. A87615 to disciplinary action under sections 2227, and 2234, as defined by section 2239, subdivision (a), of the Code, in that he has administered controlled substances to himself, as more particularly alleged hereinafter²:

19. Respondent has a long documented history of alcohol and drug dependence. Respondent first used alcohol at age 14, and drank alcohol most weekends throughout high school. During college and medical school, Respondent drank a 12-pack or more of alcohol approximately three (3) to five (5) days per week. This frequency of drinking continued through his residency, during which Respondent came to work intoxicated or hungover on multiple occasions. Respondent's addiction to alcohol had legal consequences, and resulted in two (2) alcohol-related driving citations in the past.

20. Between in or around July 1, 2002, and June 30, 2006, during his residency, Respondent began to steal Fentanyl³ from work. He initially brought the Fentanyl home for his own use, but then eventually began injecting himself with Fentanyl in the bathrooms at work.

21. In or around 2006, Respondent was offered a job as an attending anesthesiologist at the University of California San Diego (UCSD). Due to his stress and substance abuse issues, Respondent chose to take some time off before beginning his job at UCSD. During that time,

///

² Conduct occurring more than seven (7) years from the filing date of this Accusation is for informational purposes only and is not alleged as a basis for disciplinary action.

³ Fentanyl is a Schedule II controlled substance pursuant to Health and Safety Code section 11055, subdivision (c), and a dangerous drug pursuant to Business and Professions Code section 4022. Intravenous Fentanyl is often used for anesthesia and analgesia.

1 Respondent lived at home with his parents, and for several months, he drank approximately 1 liter
2 of vodka each day.

3 22. Respondent began working as an anesthesiologist at UCSD in or around 2007.

4 23. In or around July 2008, Respondent was confronted by colleagues at UCSD who
5 observed him impaired while on duty. Respondent was ordered to report to UCSD's Well Being
6 Committee, who referred him for treatment at the Hazelton Betty Ford Foundation Drug
7 Addiction Treatment Center (Betty Ford).

8 24. Between on or about July 3, 2008, through on or about October 30, 2008, Respondent
9 received treatment for addiction at Betty Ford. During that time, Respondent was diagnosed with
10 Bipolar II Disorder, and was prescribed Lexapro⁴ and Lamictal.⁵

11 25. In or around November 2008, Respondent returned to work at UCSD, and maintained
12 sobriety through regular monitoring by the Wellbeing Committee from in or around 2009 through
13 in or around 2014.

14 26. In or around October 2015, Respondent stopped seeing his psychiatrist and began
15 self-prescribing psychiatric medications.

16 27. In or around January 2016, Respondent began ordering Modafinil⁶ from India for his
17 own use.

18 28. In or around April 2016, Respondent began to steal Fentanyl from UCSD for his own
19 use.

20 29. Between in or around April 2016, through in or around October 2016, Respondent's
21 use of Fentanyl gradually increased to the point that he was injecting himself with Fentanyl
22 approximately five (5) to eight (8) times per day.

23 ⁴ Lexapro (brand name for escitalopram) is an antidepressant belonging to a group of drugs called
24 selective serotonin reuptake inhibitors, and a dangerous drug pursuant to Business and Professions Code
section 4022.

25 ⁵ Lamictal (brand name for lamotrigine) is an anticonvulsant medication used for the treatment of
26 epilepsy and bipolar disorder, and a dangerous drug pursuant to Business and Professions Code section
4022.

27 ⁶ Modafinil is a Schedule IV controlled substance pursuant to Health and Safety Code section
28 11057, subdivision (d), and a dangerous drug pursuant to Business and Professions Code section 4022.

1 30. In or around October 2016, Respondent enrolled himself in an intensive outpatient
2 treatment program at Casa Palmera Treatment Center (Casa Palmera).

3 31. From on or about October 4, 2016, through on or about October 26, 2016, Respondent
4 received treatment for addiction at Casa Palmera. Respondent did not inform UCSD of his
5 relapse or the treatment he received at Casa Palmera.

6 32. Sometime after completing his treatment at Casa Palmera, Respondent relapsed and
7 began using Fentanyl again.

8 33. On or about January 27, 2017, Respondent was scheduled to perform anesthesia on
9 surgical patients R.L., and R.D. at UCSD. At some point that morning, Respondent accidentally
10 cut his finger while cutting a bagel, causing tendon damage. Despite the injury, Respondent
11 returned to his assigned surgical cases in order to steal medication for his own use.

12 34. In preparation for the surgery of patient R.D., Respondent removed four 5 ml ampules
13 (50 mcg/ml; 1000 micrograms total) of Sufentanil⁷ from the Anesthesia Medication Supply in the
14 operating room at UCSD. T.N., a nurse anesthetist assisting Respondent, also extracted Fentanyl
15 from the Anesthesia Medication Supply in the operating room at UCSD for use in patient R.D.'s
16 surgery.

17 35. At some point during patient R.D.'s surgery, T.N. made a charting error regarding the
18 amount of Sufentanil administered to the patient. When Respondent noted the error, he told T.N.,
19 "we'll never get the dose right now, so let's make the record say we gave the whole amount."
20 The anesthesia record for this surgery indicates that 1.02 mg of Sufentanil was administered to the
21 patient. The anesthesia post procedure evaluation completed by Respondent indicates that "all
22 controlled substances during the case accounted for and disposed of per hospital policy."

23 36. After completing the surgical case on patient R.D., Respondent went into a
24 patient/staff bathroom and injected himself with Sufentanil.

25 ///

26 ⁷ Sufentanil is a Schedule II controlled substance pursuant to Health and Safety Code section
27 11055, subdivision (c), and a dangerous drug pursuant to Business and Professions Code section 4022. The
28 main use of this medication is in operating suites and during critical care where pain relief is required for a
short period of time.

37. At approximately 1:30 p.m., Respondent was found by a nurse, unconscious, face-down on the patient/staff bathroom floor, covered in vomit, with his pants down around his ankles. Three (3) syringes were located near his body, two of which still contained Sufentanil.

38. Multiple physicians were called to the bathroom to assist, and although Respondent was difficult to arouse, he eventually regained consciousness. Once awakened, Respondent was ordered to report to the UCSD emergency room for a fitness of duty evaluation. Respondent then left UCSD and never reported to the emergency room.

39. Sometime after leaving UCSD, Respondent informed UCSD that he would be taking a medical leave of absence, and enrolled himself in Professionals Treatment at Promises Treatment Center (Promises), where he received treatment for addiction from on or about February 6, 2017, through on or about April 6, 2017.

40. On or about July 31, 2017, Respondent voluntarily submitted to a psychiatric evaluation from Board-appointed psychiatrist, A.A., M.D., J.D., FCLM (Dr. A.A.) After an extensive review of records, a lengthy examination, and an interview of Respondent, Dr. A.A. concluded, among other things, that Respondent suffers from Opioid Use Disorder, Severe, In Early Remission. Dr. A.A. further opined that Respondent's ability to practice medicine safely is impaired by his opioid use disorder, and permitting Respondent to engage in the unrestricted practice of medicine will endanger the public health, safety, and welfare.

SECOND CAUSE FOR DISCIPLINE

(Use of Dangerous Drugs to an Extent, or in a Manner, as to be Dangerous to Himself, to Others, or to the Public)

41.
