Failure to successfully complete the course during the first 6 months of probation is a violation of probation.

A prescribing practices course taken after the acts that gave rise to the charges in the Accusation, but prior to the effective date of the Decision may, in the sole discretion of the Board, be accepted towards the fulfillment of this condition if the course would have been approved by the Board had the course been taken after the effective date of this Decision.

Respondent shall submit a certification of successful completion to the Board not later than 15 calendar days after successfully completing the course, or not later than 15 calendar days after the effective date of the Decision, whichever is later.

All time spent in an intensive training program outside the State of California which has been approved by the Board shall be considered as time spent in the practice of medicine within the State. A Board-ordered suspension of practice shall not be considered as a period of non-practice. Non-practice is defined as any period of time exceeding 30 calendar days in which Respondent is not engaging in any activities defined in sections 2051 and 2052 of the Business and Professions Code.

All time spent in an intensive training program which has been approved by the Board shall be considered time spent in the practice of medicine. - 12. <u>COMPLETION OF PROBATION</u> Respondent shall comply with all financial obligations (e.g., cost recovery, restitution, probation costs) not later than 120 calendar days prior to the completion of probation. If an Accusation, Petition to Revoke Probation, or an Interim Suspension Order is filed against Respondent during probation, the Board shall have continuing jurisdiction until the matter is final, and the period of probation shall be extended until the matter is final.

- 14. <u>License surrender</u> Following the effective date of this Decision, if Respondent ceases practicing due to retirement, health reasons or is otherwise unable to satisfy the terms and conditions of probation, Respondent may request the voluntary surrender of Respondent's license. The Board reserves the right to evaluate Respondent's request and to exercise its discretion whether or not to grant the request, or to take any other action deemed appropriate and reasonable under the circumstances. Upon formal acceptance of the surrender, Respondent shall within 15 calendar days deliver Respondent's wallet and wall certificate to the Board and Respondent shall no longer practice medicine. Respondent will no longer be subject to the terms and conditions of probation and the surrender of Respondent's license shall be deemed disciplinary action. If Respondent re-applies for a medical license, the application shall be treated as a petition for reinstatement of a revoked certificate.
- 15. PROBATION MONITORING COSTS Respondent shall pay the costs associated with probation monitoring each and every year of probation, as designated by the Board, which are currently set at \$3673.00, but may be adjusted on an annual basis. FIRST CAUSE FOR DISCIPLINE (Repeated Negligent Acts) [Bus, & Prof. Code, § 2234, subd. (c)]

9 Respondent is subject to disciplinary action under section 2234, subdivision (c) in that she was repeatedly negligent in her care and treatment of patients A.K. and A.E.K.² The circumstances are as follows:

Patient A.K.

- Respondent currently operates a solo practice in Roseville, California.

 Prior to her solo practice, she was employed by Roy Harris, M.D. until she left in 2005. Patient A.K. was a patient of Dr. Harris. Respondent was aware that patient A.K. had been under the care of a neurologist for seizure management, suffered from neck and back pain, and was addicted to OxyContin.
- 11. On or about February 9, 2006, patient A.K., "...who was 20 years old, presented..." for a medication review. A.K. was already taking OxyContin intranasally even though it had not been prescribed to him. A.K. told respondent that his pain was so bad, he

47 1

resorted to illegal use. Respondent was aware that A.K.'s father had been addicted to OxyContin (father had died of polypharmacy in 2004). A.K. had multiple falls from seizures and had head, neck and back pain. Respondent noted patient A.K. had suffered a second petit mai seizure and the removal of a brain cyst. The medications listed for patient A.K. included Valium and OxyContin (80 mg b.i.d. intranasally and 20 mg p.o. b.i.d.). Respondent's assessment was "chronic pain, 40 mg taken daily, refill Valium for sleep" and referred patient A.K. to another physician for seizure control. The plan was for patient A.K. to "switch now to 40 mg p.o. b.i.d. and 60 mg IN bid."

- times between March 7, 2006, through February 28, 2008. During that time, Respondent provided patient A.K. with monthly prescriptions for Tegretol. Office notes, however, do not document orders or lab results for Tegretol or CBC levels. Notes also documented Respondent's unsuccessful attempts to refer patient A.K. to a pain clinic because patient A.K. was "just an addict." Respondent also documented that patient A.K. did not want to go on methadone and was compliant with the tapering plan of gradually changing the mode of usage of OxyContin from nasal to oral. Respondent wrote numerous, almost monthly, prescriptions to patient A.K. for Valium and OxyContin.
- 13. Respondent wrote prescriptions for OxyContin to address patient A.K.'s pain and addiction. Respondent addressed patient A.K.'s OxyContin addiction by decreasing his nasal snorting of OxyContin and substituting oral doses in a tapering manner.
- 14. Respondent did not offer and/or require that A.K. sign a written pain contract. Respondent-discussed with A.K. filling the prescriptions at Safeway because she knew the pharmacist and that he had extensive pain training. A.K. paid each for the prescriptions because he did not have insurance. The cost of filing the prescriptions was approximately \$1,000 per month.
- 15. A neurologic exam was performed on October 31, 2007. The office note for the October 31, 2007, visit documents that patient A.K. was doing "very well," had no seizure

ur :

. 13

activity, some headache and anxiety that improved with Valium. Respondent also noted that the Valium possibly suppressed seizure activity.

- 16. A neurologic exam was also performed on January 17, 2008. Respondent documented that patient A.K. had a seizure while at home. Patient A.K. went to the emergency room, had a CT scan, and was bolused with Tegretol. Patient A.K. represented that he was out of Valium and his prescription was refilled for 10 mg two tablets q.i.d.
- 17. Patient A.K. underwent another neurologic exam on February 28, 2008, after having been hospitalized for seizures and subarachnoid hemorrhage. Patient A.K. was managed with 120 mg of OxyContin daily which was "now at the baseline dosage of an opiate that will hold his baseline chronic neck, back and head pain."
- 18. On February 12, 2008, patient A.K. visited the emergency room at Sutter Roseville Medical Center and was hospitalized through February 18, 2008. Patient A.K. again visited the emergency room on February 19, and was hospitalized through February 21, 2008.

Patient A.E.K.

- 19. Respondent first saw patient A.E.K. while she was employed as a physician by Dr. Harris. Patient A.E.K. continued to see Respondent after she opened her solo practice in Roseville. Patient A.E.K is the sister of Patient A.K.
- 20. On or about February 9, 2006, patient A.E.K. who was 24 years old at that time presented for a recheck of her medications. Respondent only generally noted in the medical records that she had reviewed the relevant histories. Current medications included Xanax and OxyContin. A.E.K. started using OxyContin which she obtained from a trainer at her gym for her back pain. There was no mention of pain in the medical records for this visit. Records indicated "well-appearing, in no distress." In the social history of the fact sheet in the records it is recorded "of note her father died of a polypharmacy overdose, he was primarily addicted to OxyContin." A.E.K. "found him after being dead for a number of days. Has had intermittent anxiety and difficulty sleeping since this time." Respondent prescribed intranasal OxyContin with the plan to decrease patient A.E.K.'s intranasal use of OxyContin by substituting oral doses

in a tapering manner. Pharmacy records reveal that patient A.E.K. received OxyContin on almost a monthly basis through approximately April 10, 2007.
