8 **JURISDICTION**

9 Accusation No. 800-2016-023440 was filed before the Board, and is currently pending

4 Physician's and Surgeon's Certificate.

5 9. For the purpose of resolving the Accusation without the expense and uncertainty of
6 further proceedings, Respondent agrees that, at a hearing, Complainant could establish a prima
7 facie case for the charges in the Accusation, and that Respondent hereby gives up her right to
8 contest those charges.

9 10. Respondent agrees that her Physician's and Surgeon's Certificate is subject to
10 discipline and she agrees to be bound by the Board's imposition of discipline as set forth in the

26 action between the parties, and the Board shall not be disqualified from further action by having
27 considered this matter.

28

1 educational program(s) or course(s) within 12 months of the effective date of this Decision,

1 6. Section 2266 of the Code states: The failure of a physician and surgeon to maintain
2 adequate and accurate records relating to the provision of services to their patients constitutes
3 unprofessional conduct.

4 **FIRST CAUSE FOR DISCIPLINE**
5 **(Repeated Negligent Acts)**

6 7. Respondent is subject to disciplinary action under section 2234, subdivision (c), in
7 that she was repeatedly negligent in her care and treatment of a confidential patient¹, (C.P.). The
8 circumstances are as follows:

9 8. Respondent is Board-certified in obstetrics and gynecology. C.P. was a 33-year-old
10 woman when she began her prenatal care with Respondent on or about October 5, 2012, at eight
11 weeks, five days of pregnancy. C.P. had a history of pre-term labor and gestational diabetes. She
12 had undergone two previous cesarean sections. C.P. expressed a desire to have a vaginal birth
13 after cesarean section (VBAC), after a trial of labor, and was consented for this. She was
14 provided with a written informed consent of the risks of VBAC, including the risk of uterine
15 rupture and death. During the prenatal care, C.P. was diagnosed with a low lying placenta.
16 C.P.'s prenatal records do not contain any further treatment or monitoring for the low lying
17 placenta. There was no documentation of serial measurement of lower uterine segment thickness
18 or placental growth relative to the previous cesarean section scar.

19 9. On or about May 6, 2013, in the early morning, C.P. was admitted to Doctor's
20 Hospital of Manteca in labor with spontaneous rupture of membranes. The fetal heart rate
21 showed minimal variability at various points during the early morning, although nursing staff
22 reported the variability was positive. At approximately 7:00 a.m., C.P. received an epidural for
23 pain relief. Respondent saw C.P. later in the morning and determined she was in early labor with
24 normal progress. No pelvic examination or review of the fetal heart strips was documented.

25 10. At approximately 9:30 a.m., C.P. began experiencing pain. The pain extended into
26 the right lower quadrant. At approximately 11:00 a.m., C.P. received intravenous Fentanyl. The
27 nurses observed decreased variability in the fetal heart rate and repositioned C.P. to her right side.

28 ¹ The patient name has been omitted to protect patient confidentiality.

1 Respondent examined C.P. at approximately 12:30 p.m., and noted her cervix was dilated to eight
2 centimeters and the vertex was at zero station. Respondent wrote the only progress note of the
3 labor at approximately 12:35 p.m. She noted the dilation and station, and noted that C.P. reported
4 right-sided pain only. Respondent did not document the pain further, did not document palpating
5 the abdomen, and did not document any information about meconium, vaginal bleeding or blood
6 in the abdomen.

7 11. The labor continued to the anterior lip. At 2:15 p.m., C.P. received additional
8 Fentanyl for pain. The fetal heart decelerated. Nurses called Respondent at approximately 2:34
9 p.m. and asked her to come for the delivery. Shortly after calling Respondent, the nurses lost the
10 fetal heart rate. Respondent arrived at C.P.'s room sometime between 2:43 p.m. and 2:49 p.m.
11 A new scalp electrode and monitor cables were placed. Respondent called for a vacuum. At
12 approximately 2:45 p.m., C.P. was completely dilated and at 2+ station. By 2:47, heart tones
13 remained in the 60's.

14 12. Respondent asked C.P. to push. A sudden loss of fetal station was noted.
15 Respondent diagnosed C.P. with uterine rupture and called for an emergency cesarean section. At
16 2:56 p.m., nurses called for a transfer to the Operating Room. A new foley catheter was placed.

17 13. C.P. was in the Operating Room by 3:00 p.m. Respondent had not alerted the
18 Delivery Unit or the Anesthesia Department of the potential need for an emergency cesarean
19 section in C.P.'s case. Respondent administered Marcaine, a local anesthetic. In the Operating
20 Room, Respondent attempted to use the vacuum. It was not successful. There is no
21 documentation of the details of the attempted use of the vacuum. Respondent made the first
22 incision at 3:08 p.m. C.P. was experiencing extreme pain and pleaded with Respondent to stop
23 the procedure and wait for anesthesia. Respondent continued the procedure. Respondent was
24 unable to deliver the vertex through the skin.

25 14. At approximately 3:20 p.m., the anesthesiologist arrived. By 3:25 p.m., the
26 anesthesiologist had induced general anesthesia of C.P. Respondent did not document the time of
27 delivery, but it was sometime after general anesthesia was induced at 3:25 p.m. The baby was
28 free floating in the abdomen and the placenta was detached. The baby did not survive.

1 Respondent's operative report did not document the presence or absence of blood in the abdomen.
2 It did not address uterine bleeding from the rupture site.

3 Respondent was repeatedly negligent in her care and treatment of C.P. in that each of the
4 following represents a separate departure from the standard of care:

- 5 (a) Failure to take appropriate precautions to prepare for an emergency cesarean section in
6 a patient attempting a VBAC, including informing the labor and delivery staff and the
7 Anesthesia Department of the potential need for emergency care;
- 8 (b) Failure to adequately and accurately document C.P.'s care; and
- 9 (c) Failure to discuss the risks and benefits of proceeding with an emergency cesarean
10 section without the presence of adequate pain relief and obtain C.P.'s consent, either
11 before or during the procedure.

12 **SECOND CAUSE FOR DISCIPLINE**
13 **(Inadequate Recordkeeping)**

14 15. Respondent is subject to disciplinary action under section 2266 of the Code by failing
15 to maintain adequate and accurate records relating to the provision of medical care to C.P.

16 16. Paragraphs 8 through 14, above are incorporated by reference and repeated as if fully
17 set forth.

18 **PRAYER**

19 WHEREFORE, Complainant requests that a hearing be held on the matters herein alleged,
20 and that following the hearing, the Medical Board of California issue a decision:

- 21 1. Revoking or suspending Physician's and Surgeon's Certificate Number A 88521,
22 issued to Tonja Lynette Harris-Stansil, M.D.;

24 authority to supervise physician assistants and advanced practice nurses;
- 25 3. Ordering Tonja Lynette Harris-Stansil, M.D., if placed on probation, to pay the Board
26 the costs of probation monitoring; and
