JURISDICTION

3. This Accusation is brought before the Board, under the authority of the following laws. All section references are to the Business and Professions Code (Code) unless otherwise indicated.

4. Section 2227 of the Code provides that a licensee who is found guilty under the Medical Practice Act may have his or her license revoked, suspended for a period not to exceed one year, placed on probation and required to pay the costs of probation monitoring, or such other action taken in relation to discipline as the Board deems proper.

5. Section 2234 of the Code states, in pertinent part:

The board shall take action against any licensee who is charged with unprofessional conduct. In addition to other provisions of this article, unprofessional conduct includes, but is not limited to, the following:

(a) Violating or attempting to violate, directly or indirectly, assisting in or abetting the violation of, or conspiring to violate any provision of this chapter.

(b) Gross negligence.

(c) Repeated negligent acts.

(d) Incompetence.

FIRST CAUSE FOR DISCIPLINE

(Unprofessional Conduct/Gross Negligence/Repeated Negligent Acts/Incompetence)

6. Respondent is subject to disciplinary action under sections 2234 and/or 2234(b) and/or 2234(c) in that Respondent engaged in unprofessional conduct and/or was grossly negligent and/or committed repeated acts of negligence in his care and treatment of Patient.¹ The circumstances are as follows:

7. Respondent practices as an endocrinologist. Patient had a history of Graves' disease² for which she received radioactive iodine treatment in 2013. Following treatment, Patient

¹ The patient is referred to as Patient to protect privacy.

² Graves' disease is an immune system disorder that results in overproduction of thyroid hormones.

1 developed hypothyroidism and was prescribed levothyroxine. In 2018, Patient's primary care
2 physician referred her to Respondent for a thyroid consultation. At the time of the referral, the
3 primary care physician prescribed levothyroxine 125 mcg per day.

4 8. Respondent saw Patient on November 21, 2018. Respondent met with Patient,
5 obtained a history and performed a review of systems. He reviewed laboratory test results from
6 May 2018 showing elevated thyroid stimulating hormone and normal prolactin levels.
7 Respondent did not order or obtain current lab work.

8 9. After Respondent completed the patient history portion of the visit, Patient was
9 instructed to disrobe from the waist up and put on a paper gown. Respondent then re-entered the
10 room. No chaperone was present. Respondent listened to Patient's heart with a stethoscope.
11 Then, without warning and without patient permission, Respondent grabbed both of Patient's
12 nipples with his ungloved hands, squeezed the nipples in a pinching, twisting motion, and
13 commented on the appearance of Patient's nipples.

14 10. Respondent stated during his interview with the Board's investigator that he had no
15 recollection of Patient or the November 2018 office visit. He acknowledged that when he has
16 concern about significant hypothyroidism, he may examine a patient's breasts to see if there is
17 nipple discharge.

18 11. Based on the May 2018 lab result showing elevated thyroid stimulating hormone
19 level and Patient's complaint of tiredness, Respondent increased the levothyroxine from 125 to
20 137 mcg daily, and instructed her to return in two months for follow-up.

21 12. Respondent is guilty of unprofessional conduct and Respondent's certificate is
22 subjected to discipline pursuant to Sections 2234 and/or 2234(b) and/or 2234(c) and/or 2234(d) of
23 the Code based upon unprofessional conduct, and/or gross negligence and/or repeated negligent
24 acts, and/or incompetence, including but not limited to the following:

25 A. Respondent increased Patient's thyroid medication based solely on symptoms, without
26 obtaining current laboratory tests.

27 B. Respondent touched Patient's breasts and/or nipples without prior discussion or patient
28 permission, and without medical indication.

C. Respondent's practice of squeezing the nipples of hypothyroid patients, even in the absence of laboratory tests showing elevated prolactin or breast complaints, indicates a lack of current knowledge or ability.

WHEREFORE, Complainant requests that a hearing be held on the matters herein alleged, and that following the hearing, the Medical Board of California issue a decision:

1. Revoking or suspending Physician's and Surgeon's Certificate Number C 39702, issued to Frank Siu-Fung Hsu, M.D.;
