STATE OF CALIFORNIA**

In the Matter of the Accusation Against:

Royce Lewis Hutain, M.D.

**Physician's and Surgeon's
Certificate No. G 35907**

Case No. 800-2017-030471

Respondent.

DECISION

The attached Stipulated Surrender of License and Order is hereby adopted as the Decision and Order of the Medical Board of California, Department of Consumer Affairs, State of California.

This Decision shall become effective at 5:00 p.m. on March 31, 2021.

IT IS SO ORDERED January 7, 2021.

MEDICAL BOARD OF CALIFORNIA

For: William Prasifka *REJI VARGHESE*
Executive Director *DEPUTY DIRECTOR*

10 **BEFORE THE**
11 **MEDICAL BOARD OF CALIFORNIA**
12 **DEPARTMENT OF CONSUMER AFFAIRS**
13 **STATE OF CALIFORNIA**

14 In the Matter of the Accusation Against:

Case No. 8002017030471

15 **ROYCE LEWIS HUTAIN, M.D.**
16 **955 W. Imperial Way, #110**
17 **Brea, CA 92821-3812**

OAH No. 2020040618

**STIPULATED SURRENDER OF
LICENSE AND DISCIPLINARY ORDER**

18 **Physician's and Surgeon's Certificate No. G
35907**

Respondent.

19 IT IS HEREBY STIPULATED AND AGREED by and between the parties to the above-
20 entitled proceedings that the following matters are true:

21 **PARTIES**

22 1. William Prasifka (Complainant) is the Executive Director of the Medical Board of
23 California (Board).¹ This action was brought by then Complainant Christine J. Lally, Interim
24 Executive Director, solely in her official capacity. Complainant is represented in this matter by
25 Xavier Becerra, Attorney General of the State of California, by Tessa L. Heunis, Deputy Attorney
26 General.

27 *////*

28 ¹ Mr. Prasifka became the Executive Director of the Medical Board on June 15, 2020.

2. Royce Lewis Hutain, M.D. (Respondent) is represented in this proceeding by attorney Raymond J. McMahon, whose address is: 5440 Trabuco Road, Irvine, CA 92620.

3. On or about December 30, 1977, the Board issued Physician's and Surgeon's Certificate No. G 35907 to Respondent. The Physician's and Surgeon's Certificate was in full force and effect at all times relevant to the charges brought in Accusation No. 8002017030471 and will expire on November 30, 2022, unless renewed.

JURISDICTION

4. On February 11, 2020, Accusation No. 8002017030471 was filed before the Board and is currently pending against Respondent. A true and correct copy of the Accusation and all other statutorily required documents were properly served on Respondent on February 11, 2020. Respondent timely filed his Notice of Defense contesting the Accusation. A true and correct copy of Accusation No. 8002017030471 is attached as Exhibit A and incorporated herein by reference.

ADVISEMENT AND WAIVERS

5. Respondent has carefully read, fully discussed with counsel, and fully understands the charges and allegations in Accusation No. 8002017030471. Respondent also has carefully read, fully discussed with counsel, and fully understands the effects of this Stipulated Surrender of License and Disciplinary Order.

6. Respondent is fully aware of his legal rights in this matter, including the right to a hearing on the charges and allegations in the Accusation; the right to confront and cross-examine the witnesses against him; the right to present evidence and to testify on his own behalf; the right to the issuance of subpoenas to compel the attendance of witnesses and the production of documents; the right to reconsideration and court review of an adverse decision; and all other rights accorded by the California Administrative Procedure Act and other applicable laws.

7. Having the benefit of counsel, Respondent voluntarily, knowingly, and intelligently waives and gives up each and every right set forth above.

////

////

1 **CULPABILITY**

2 8. Respondent does not contest that, at an administrative hearing, Complainant could
3 establish a *prima facie* case with respect to the charges and allegations contained in Accusation
4 No. 8002017030471 and that his Physician's and Surgeon's Certificate No. G 35907 is therefore
5 subject to discipline. Respondent hereby surrenders his Physician's and Surgeon's Certificate
6 No. G 35907 for the Board's formal acceptance with an agreed upon effective date of March 31,
7 2021.

8 9. Respondent agrees that if he ever petitions for reinstatement of his Physician's and
9 Surgeon's Certificate No. G 35907, all of the charges and allegations contained in Accusation No.
10 8002017030471 shall be deemed true, correct and fully admitted by Respondent for purposes of
11 any such proceeding or any other licensing proceeding involving Respondent in the State of
12 California or elsewhere.

13 10. Respondent understands that by signing this stipulation, he enables the Board to issue
14 an order accepting the surrender of his Physician's and Surgeon's Certificate No. G 35907
15 without further process.

16 **CONTINGENCY**

17 11. Business and Professions Code section 2224, subdivision (b), provides, in pertinent
18 part, that the Board "shall delegate to its executive director the authority to adopt a ... stipulation
19 for surrender of a license."

20 12. Respondent understands that, by signing this stipulation, he enables the Executive
21 Director of the Board to issue an order, on behalf of the Board, accepting the surrender of his
22 Physician's and Surgeon's Certificate No. G 35907 without further notice to, or opportunity to be
23 heard by, Respondent.

24 13. This Stipulated Surrender of License and Disciplinary Order shall be subject to the
25 approval of the Executive Director on behalf of the Board. The parties agree that this Stipulated
26 Surrender of License and Disciplinary Order shall be submitted to the Executive Director for her
27 consideration in the above-entitled matter and, further, that the Executive Director shall have a
28 reasonable period of time in which to consider and act on this Stipulated Surrender of License and

1 Disciplinary Order after receiving it. By signing this stipulation, Respondent fully understands
2 and agrees that he may not withdraw his agreement or seek to rescind this stipulation prior to the
3 time the Executive Director, on behalf of the Medical Board, considers and acts upon it.

4 14. The parties agree that this Stipulated Surrender of License and Disciplinary Order
5 shall be null and void and not binding upon the parties unless approved and adopted by the
6 Executive Director on behalf of the Board, except for this paragraph, which shall remain in full
7 force and effect. Respondent fully understands and agrees that in deciding whether or not to
8 approve and adopt this Stipulated Surrender of License and Disciplinary Order, the Executive
9 Director and/or the Board may receive oral and written communications from its staff and/or the
10 Attorney General's Office. Communications pursuant to this paragraph shall not disqualify the
11 Executive Director, the Board, any member thereof, and/or any other person from future
12 participation in this or any other matter affecting or involving Respondent. In the event that the
13 Executive Director on behalf of the Board does not, in her discretion, approve and adopt this
14 Stipulated Surrender of License and Disciplinary Order, with the exception of this paragraph, it
15 shall not become effective, shall be of no evidentiary value whatsoever, and shall not be relied
16 upon or introduced in any disciplinary action by either party hereto. Respondent further agrees
17 that should this Stipulated Surrender of License and Disciplinary Order be rejected for any reason
18 by the Executive Director on behalf of the Board, Respondent will assert no claim that the
19 Executive Director, the Board, or any member thereof, was prejudiced by its/his/her review,
20 discussion and/or consideration of this Stipulated Surrender of License and Disciplinary Order or
21 of any matter or matters related hereto.

22 **ADDITIONAL PROVISIONS**

23 15. This Stipulated Surrender of License and Disciplinary Order is intended by the parties
24 herein to be an integrated writing representing the complete, final and exclusive embodiment of the
25 agreements of the parties in the above-entitled matter.

26 16. The parties agree that copies of this Stipulated Surrender of License and Disciplinary
27 Order, including copies of the signatures of the parties, may be used in lieu of original documents
28 and signatures and, further, that such copies shall have the same force and effect as originals.

17. In consideration of the foregoing admissions and stipulations, the parties agree the Executive Director of the Board may, without further notice to or opportunity to be heard by Respondent, issue and enter the following Disciplinary Order on behalf of the Board:

ORDER

IT IS HEREBY ORDERED that Physician's and Surgeon's Certificate No. G 35907, issued to Respondent Royce Lewis Hutain, M.D., is surrendered and accepted by the Board.

1. The surrender of Respondent's Physician's and Surgeon's Certificate No. G 35907 and the acceptance of the surrendered license by the Board shall constitute the imposition of discipline against Respondent. This stipulation constitutes a record of the discipline and shall become a part of Respondent's license history with the Board.

2. Respondent shall lose all rights and privileges as a Physician and Surgeon in California as of the effective date of the Board's Decision and Order which shall be on March 31, 2021.

3. Respondent shall cause to be delivered to the Board his pocket license and, if one was issued, his wall certificate on or before the effective date of the Decision and Order.

4. If he ever applies for licensure or petitions for reinstatement in the State of California, the Board shall treat it as a petition for reinstatement. Respondent must comply with all the laws, regulations and procedures for reinstatement of a revoked or surrendered license in effect at the time the petition is filed, and all of the charges and allegations contained in Accusation No. 8002017030471 shall be deemed to be true, correct, and admitted by Respondent when the Board determines whether to grant or deny the application or petition.

5. If Respondent should ever apply or reapply for a new license or certification, or petition for reinstatement of a license, by any other health care licensing agency in the State of California, all of the charges and allegations contained in Accusation, No. 8002017030471 shall be deemed to be true, correct, and admitted by Respondent for the purpose of any Statement of Issues or any other proceeding seeking to deny or restrict licensure.

////

////

ACCEPTANCE

I have carefully read the above Stipulated Surrender of License and Disciplinary Order and have fully discussed it with my attorney Raymond J. McMahon. I fully understand the stipulation and the effect it will have on my Physician's and Surgeon's Certificate No. G 35907. I enter into this Stipulated Surrender of License and Disciplinary Order voluntarily, knowingly, and intelligently, and agree to be bound by the Decision and Order of the Medical Board of California.

DATED:

12/23/2020ROYCE LEWIS HUTAIN, M.D.
Respondent

I have read and fully discussed with Respondent Royce Lewis Hutain, M.D. the terms and conditions and other matters contained in this Stipulated Surrender of License and Disciplinary Order. I approve its form and content.

DATED:

December 23, 2020RAYMOND J. MCMAHON, ESQ.
*Attorney for Respondent*ENDORSEMENT

The foregoing Stipulated Surrender of License and Disciplinary Order is hereby respectfully submitted for consideration by the Medical Board of California of the Department of Consumer Affairs.

DATED: December 23, 2020

STATE OF CALIFORNIA

In the Matter of the Accusation Against:

Case No. 800-2017-030471

Royce Lewis Hutain, M.D.
955 W. Imperial Hwy #110
Brea, CA 92821-3812

ACCUSATION

Physician's and Surgeon's Certificate
No. G 35907,

Respondent.

PARTIES

1. Christine J. Lally (Complainant) brings this Accusation solely in her official capacity as the Interim Executive Director of the Medical Board of California, Department of Consumer Affairs (Board).

2. On or about December 30, 1977, the Medical Board issued Physician's and Surgeon's Certificate Number G 35907 to Royce Lewis Hutain, M.D. (Respondent). The Physician's and Surgeon's Certificate was in full force and effect at all times relevant to the charges brought herein and will expire on November 30, 2020, unless renewed.

////

JURISDICTION

3. This Accusation is brought before the Board, under the authority of the following laws. All section references are to the Business and Professions Code (Code) unless otherwise indicated.

4. Section 2220 of the Code states, in pertinent part, that the Board may take action against all persons guilty of violating the Medical Practice Act, and shall have all the powers granted in Division 5, Chapter 5, of the Code, for these purposes.

5. Section 2227 of the Code states:

(a) A licensee whose matter has been heard by an administrative law judge of the Medical Quality Hearing Panel as designated in Section 11371 of the Government Code, or whose default has been entered, and who is found guilty, or who has entered into a stipulation for disciplinary action with the board, may, in accordance with the provisions of this chapter:

(1) Have his or her license revoked upon order of the board.

(2) Have his or her right to practice suspended for a period not to exceed one year upon order of the board.

(3) Be placed on probation and be required to pay the costs of probation monitoring upon order of the board.

(4) Be publicly reprimanded by the board. The public reprimand may include a requirement that the licensee complete relevant educational courses approved by the board.

(5) Have any other action taken in relation to discipline as part of an order of probation, as the board or an administrative law judge may deem proper.

...

6. Section 2234 of the Code, states:

The board shall take action against any licensee who is charged with unprofessional conduct. In addition to other provisions of this article, unprofessional conduct includes, but is not limited to, the following:

(a) Violating or attempting to violate, directly or indirectly, assisting in or abetting the violation of, or conspiring to violate any provision of this chapter.

(b) Gross negligence.

(c) Repeated negligent acts. To be repeated, there must be two or more negligent acts or omissions. An initial negligent act or omission followed by a separate and distinct departure from the applicable standard of care shall constitute repeated negligent acts.

(1) An initial negligent diagnosis followed by an act or omission medically

1 appropriate for that negligent diagnosis of the patient shall constitute a single
2 negligent act.

3 (2) When the standard of care requires a change in the diagnosis, act, or
4 omission that constitutes the negligent act described in paragraph (1), including, but
5 not limited to, a reevaluation of the diagnosis or a change in treatment, and the
6 licensee's conduct departs from the applicable standard of care, each departure
7 constitutes a separate and distinct breach of the standard of care.

8 ...

9 (f) Any action or conduct which would have warranted the denial of a
10 certificate.

11 ...

12 7. Section 2228 of the Code states:

13 The authority of the board ... to discipline a licensee by placing him or her on
14 probation includes, but is not limited to, the following:

15 (a) Requiring the licensee to obtain additional professional training and to pass
16 an examination upon the completion of the training. The examination may be written
17 or oral, or both, and may be a practical or clinical examination, or both, at the option
18 of the board or the administrative law judge.

19 (b) Requiring the licensee to submit to a complete diagnostic examination by
20 one or more physicians and surgeons appointed by the board. If an examination is
21 ordered, the board shall receive and consider any other report of a complete
22 diagnostic examination given by one or more physicians and surgeons of the
23 licensee's choice.

24 (c) Restricting or limiting the extent, scope, or type of practice of the licensee,
25 including requiring notice to applicable patients that the licensee is unable to perform
26 the indicated treatment, where appropriate.

27 (d) Providing the option of alternative community service in cases other than
28 violations relating to quality of care.

8. Section 2266 of the Code states:

The failure of a physician and surgeon to maintain adequate and accurate
records relating to the provision of services to their patients constitutes unprofessional
conduct.

9. Section 2241.5 of the Code states:

(a) A physician and surgeon may prescribe for, or dispense or administer to, a
person under his or her treatment for a medical condition dangerous drugs or
prescription controlled substances for the treatment of pain or a condition causing
pain, including, but not limited to, intractable pain.

(b) No physician and surgeon shall be subject to disciplinary action for

1 prescribing, dispensing, or administering dangerous drugs or prescription controlled
2 substances in accordance with this section.

3 (c) This section shall not affect the power of the board to take any action
4 described in Section 2227 against a physician and surgeon who does any of the
5 following:

6 (1) Violates subdivision (b), (c), or (d) of Section 2234 regarding gross
7 negligence, repeated negligent acts, or incompetence.

8 (2) Violates Section 2241 regarding treatment of an addict.

9 (3) Violates Section 2242 or 2525.3 regarding performing an appropriate prior
10 examination and the existence of a medical indication for prescribing, dispensing, or
11 furnishing dangerous drugs or recommending medical cannabis.

12 ...

13 (7) Prescribes, administers, or dispenses in violation of this chapter, or in
14 violation of Chapter 4 (commencing with Section 11150) or Chapter 5 (commencing
15 with Section 11210) of Division 10 of the Health and Safety Code.

16 (d) A physician and surgeon shall exercise reasonable care in determining
17 whether a particular patient or condition, or the complexity of a patient's treatment,
18 including, but not limited to, a current or recent pattern of drug abuse, requires
19 consultation with, or referral to, a more qualified specialist.

20 ...

21 10. Section 2242 of the Code states:

22 (a) Prescribing, dispensing, or furnishing dangerous drugs as defined in Section
23 4022 without an appropriate prior examination and a medical indication, constitutes
24 unprofessional conduct. An appropriate prior examination does not require a
25 synchronous interaction between the patient and the licensee and can be achieved
26 through the use of telehealth, including, but not limited to, a self-screening tool or a
27 questionnaire, provided that the licensee complies with the appropriate standard of
28 care.

29 ...

30 11. Section 4021 of the Code states:

31 "Controlled substance" means any substance listed in Chapter 2 (commencing
32 with Section 11053) of Division 10 of the Health and Safety Code.

33 12. Section 4022 of the Code states:

34 "Dangerous drug" or "dangerous device" means any drug or device unsafe for
35 self-use in humans or animals, and includes the following:

36 (a) Any drug that bears the legend: "Caution: federal law prohibits dispensing
37 without prescription," "Rx only," or words of similar import.

1 ...
2 (c) Any other drug or device that by federal or state law can be lawfully
3 dispensed only on prescription or furnished pursuant to Section 4006.

4 13. Unprofessional conduct under Business and Professions Code section 2234 is conduct
5 which breaches the rules or ethical code of the medical profession, or conduct which is
6 unbecoming of a member of good standing of the medical profession, and which demonstrates an
7 unfitness to practice medicine. (*Shea v. Board of Medical Examiners* (1978) 81 Cal.App.3d 564,
8 575.)

9 **DEFINITIONS**

10 14. Oxycontin is a brand name for oxycodone, a Schedule II controlled substance
11 pursuant to Health and Safety Code section 11055, subdivision (b), and a dangerous drug
12 pursuant to Business and Professions Code section 4022.

13 15. Morphine sulfate is a Schedule II controlled substance pursuant to Health and Safety
14 Code section 11057, subdivision (b), and a dangerous drug pursuant to Business and Professions
15 Code section 4022. It is sold under the brand name MS Contin.

16 16. Dextroamphetamine Saccharate, Amphetamine Aspartate, Dextroamphetamine
17 Sulfate, Amphetamine Sulfate is a single-entity amphetamine product, often referred to as an
18 amphetamine salt combo. It is a Schedule II controlled substance pursuant to Health and Safety
19 Code section 11055, subdivision (d), and a dangerous drug pursuant to Business and Professions
20 Code section 4022. It is frequently sold under the brand name Adderall, which is used for the
21 treatment of Attention Deficit (Hyperactivity) Disorder (ADD/ADHD).

22 17. Vyvanse is a brand name for lisdexamfetamine, a Schedule II controlled substance
23 pursuant to Health and Safety Code section 11055, subdivision (d), and a dangerous drug
24 pursuant to Business and Professions Code section 4022. It is used to treat ADD/ADHD.

25 18. Oxymorphone is a Schedule II controlled substance pursuant to Health and Safety
26 Code section 11055, subdivision (b), and a dangerous drug pursuant to Business and Professions
27 Code section 4022.

28 ////

1 19. Hydromorphone is a Schedule II controlled substance pursuant to Health and Safety
2 Code section 11055, subdivision (b), and a dangerous drug pursuant to Business and Professions
3 Code section 4022. Dilaudid is a brand name for hydromorphone.

4 20. Norco is a brand name for hydrocodone bitartrate acetaminophen, a Schedule III
5 controlled substance pursuant to Health and Safety Code section 11056, subdivision (e), and a
6 dangerous drug pursuant to Business and Professions Code section 4022. Hydrocodone belongs
7 to a class of drugs known as opioids.

8 21. Soma is a brand name for carisoprodol, a Schedule IV controlled substance under the
9 Uniform Controlled Substances Act, and a dangerous drug pursuant to Business and Professions
10 Code section 4022.

11 22. Xanax is a brand name for alprazolam, a Schedule IV controlled substance pursuant
12 to Health and Safety Code section 11057, subdivision (d), and a dangerous drug pursuant to
13 Business and Professions Code section 4022. It belongs to a class of drugs called
14 benzodiazepines.

15 23. Ativan is a brand name for lorazepam, a Schedule IV controlled substance pursuant to
16 Health and Safety Code section 11057, subdivision (d), and a dangerous drug pursuant to
17 Business and Professions Code section 4022. It is an anti-anxiety medication in the
18 benzodiazepine family.

19 24. Clonazepam is a Schedule IV controlled substance pursuant to Health and Safety
20 Code section 11057, subdivision (d), and a dangerous drug pursuant to Business and Professions
21 Code section 4022. It is an anti-anxiety medication in the benzodiazepine family.

22 25. Ambien is a brand name for zolpidem tartrate, a Schedule IV controlled substance
23 pursuant to Health and Safety Code section 11057, subdivision (d), and a dangerous drug
24 pursuant to Business and Professions Code section 4022.

25 26. Valsartan is used to treat high blood pressure and heart failure and belongs to a class
26 of drugs called angiotensin receptor blockers. It is a dangerous drug pursuant to Business and
27 Professions Code section 4022.

28 ////

1 27. Klor-Con is a brand name for potassium chloride, a mineral supplement used to treat
2 or prevent low amounts of potassium in the blood. It is a dangerous drug pursuant to Business
3 and Professions Code section 4022.

4 28. Gabapentin is most commonly prescribed to relieve nerve pain, and is a dangerous
5 drug pursuant to Business and Profession Code section 4022.

6 29. Zoloft (sertraline) is an antidepressant belonging to a group of drugs called selective
7 serotonin reuptake inhibitors (SSRI's). It is a dangerous drug pursuant to Business and
8 Professions Code section 4022.

9 30. Angiotensin II is a chemical formed in the blood that causes muscles surrounding
10 blood vessels to contract, thereby narrowing the vessels. This narrowing increases the pressure
11 within the vessels and can cause high blood pressure (hypertension). Angiotensin II receptor
12 blockers (ARB's) prevent angiotensin II from binding to angiotensin II receptors on the muscles
13 surrounding blood vessels. As a result, blood vessels dilate and blood pressure is reduced.

14 31. Angiotensin-converting enzyme (ACE) inhibitors are heart medications that widen, or
15 dilate, your blood vessels. Lisinopril is an ACE inhibitor.

16 32. International normalized ratio (INR) is a system established by the World Health
17 Organization (WHO) and the International Committee on Thrombosis and Hemostasis for
18 reporting the results of blood coagulation (clotting) tests.

19 33. Controlled Substance Utilization Review and Evaluation System (CURES) is a
20 database of Schedule II, III and IV controlled substance prescriptions dispensed in California. It
21 is compiled by the California Department of Justice, Bureau of Criminal Identification and
22 Investigative Services as part of its Prescription Drug Monitoring Program.

23 34. Hyperalgesia is an enhanced pain response that can result from either injury to part of
24 the body or from use of opioid painkillers. In the latter instance, the condition is called opioid-
25 induced hyperalgesia.

26 35. Morphine equivalent dosing determines a patient's cumulative intake of any drugs in
27 the opioid class over 24 hours. Each opioid (that the patient is likely to take per day) is assigned a
28 morphine equivalent value, and these values are added to find the daily morphine equivalent dose.

FACTUAL ALLEGATIONS

36. At all relevant times, Respondent was board-certified in Family Medicine.

37. The standard of care for physicians prescribing controlled substances is that the physician should do so in substantial compliance with the published guidelines from the Board. In addition, the provider must follow applicable State and Federal laws regulating the prescribing of controlled substances. These guidelines include the following requirements:

a. The documentation of an independent, good faith interview and face-to-face examination of the patient and patient records in order to confirm the presence of specific conditions that necessitate potentially addictive pain medication. In addition, regular office visit follow ups are required. Informed consent for the use of controlled substances should be documented.

b. Physicians should make efforts to use less risky alternatives than controlled substances, when available, and document discussions of risks with patients. Trials of non-pharmacological treatment modalities, such as physical therapy, and medications that are not controlled substances, must be documented before prescribing opiates for chronic, non-malignant pain.

c. The patient's baseline level of functioning must be documented, both initially and in follow up. Frequent, ongoing monitoring is necessary with the goal of lowering or eliminating opioids and controlled substance medications whenever possible.

d. Physicians prescribing opioids and other controlled substances must be aware of, on the lookout for, and respond appropriately to, red flags of opioid misuse and diversion.

e. The physician must refer the patient to specialists when appropriate, including pain management specialists and addiction specialists, among others.

38. The standard of care when a patient presents to a clinic with elevated blood pressure requires that the provider document a history of present illness or injury. If applicable, any symptoms referable to the blood pressure should be determined and on-going organ damage ruled out or treated. Previous blood pressure problems or complications must be documented as well as any pharmacologic and non-pharmacologic therapies that have been tried. Elevated blood

1 pressures should be retested to determine if the elevation persists. An electrocardiogram and
2 various lab tests including kidney function, electrolytes, urinalysis, lipid panel and blood sugar
3 testing should be done as part of an initial evaluation of hypertension. Appropriate follow up for
4 repeat blood pressure checks should be arranged.

5 39. The standard of care is to keep timely, accurate, complete and legible medical
6 records.

7 40. The standard of care for primary care physicians when their patients have a manic
8 episode or psychotic break is to ensure proper diagnosis and follow up by a psychiatrist after
9 discharge from a psychiatric facility. When the patient is stabilized, prescribing and care may be
10 transferred to a primary care physician with periodic input and co-management by a psychiatrist.

11 41. The standard of care for the evaluation and management of ADD/ADHD in adults
12 requires that the condition be appropriately diagnosed. A substance use history must be
13 documented to ensure patient safety. To warrant evaluation and treatment, the symptoms of
14 ADHD must be severe enough to cause significant social impairment. These social impairments
15 need to be documented, along with age of symptom onset and impairment. Medications can have
16 significant side effects and periodically the patient should be assessed for appetite suppression,
17 elevated bloodpressure, weight loss, dry mouth and mood abnormliaites. The patient's response
18 to therapy should be documented. When ADHD and anxiety disorder co-exist, the first line of
19 treatment should include an SSRI to prevent additional risk of misuse of benzodiazepines.

20 Patient A:¹

21 42. Patient A is a male person, born in 1952.

22 43. Between January 2015 and August 2018, at least once a month, Patient A filled
23 prescriptions written by Respondent for 240 x Norco 10/325 tablets.² From September 2018 to
24 December 2018, Respondent alternated between monthly prescriptions for 210 and 180 tablets
25 before resuming monthly prescriptions for 240 tablets in January 2019.

26 ¹ The names have been omitted for all patients referenced in this pleading. Respondent is aware of
27 the patients' identities.

28 ² Patient A's CURES report does not show prescriptions filled during April 2015, October 2015,
and February 2016.

1 44. During the course of the four year period from 2015 through 2019,³ Respondent had
2 seven face-to-face visits with Patient A.

3 45. On or about March 4, 2015,⁴ Patient A presented to Respondent for “follow up of
4 diabetes medication.” Patient A complained of toe bruising from “hiling” (sic) and some night
5 sweats due to low blood sugar. Respondent’s progress note for this visit contains no documented
6 history of any other painful condition. Under the heading “current meds,” there are nine
7 medications listed, including Valsartan and Lisinopril for diabetes and three medications to
8 control blood pressure. The list also includes Norco 10/325 tablets, 2 tablets “every 4 hours as
9 needed for pain.” Patient A’s vital signs include the notation, “Blood Pressure not obtained; BP
10 not obtained Unable to obtain BP...” Respondent records a negative systems review, including
11 “no musculoskeletal symptoms” and “no neurological symptoms,” with the rest of the physical
12 exam being apparently normal. There is no documented diabetic foot exam. Respondent’s
13 assessment at this visit includes “painful diabetic neuropathy.” No follow up plan is documented.

14 46. The next chart entry for Patient A is dated March 6, 2015. No history or physical
15 exam is recorded, and the orders are to renew the prescription for Norco 10/325, 2 tablets every 4
16 hours as needed for pain, quantity 240.

17 47. Patient A is next seen by Respondent on or about December 14, 2015, when he
18 presented “for follow up of medications.” According to Respondent’s chart notes, Patient A is
19 “doing well most of the pain is due to severe diab[etic] neuropathy - has tried lyrica but can’t
20 handle only 2 lyrica as a rule per day has been on the same dosage of hydrocodone for yrs with no
21 increase.” Patient A’s systems review was documented as all normal. His vital signs included a
22 blood pressure of 164/80, heart rate 61 beats per minute and the rest of Patient A’s physical exam
23 was normal. Respondent’s assessments at this visit included painful diabetic neuropathy,
24 hypertension, chronic pain in the right foot, chronic pain in the left foot, and controlled diabetes
25 mellitus. There is no documented diabetic foot exam.

26
27 ³ The medical records of Patient A, Patient B, and Patient C, were obtained on or about January
28 24, 2019, and consequently no treatment by Respondent of these three patients beyond that date was
reviewed.

⁴ March 4, 2015, is the earliest date for which Patient A’s medical records were available.

1 48. On or about March 23, 2016, Patient A again presents to Respondent, for a
2 "preventive physical exam and f/u on meds." Respondent records that Patient A "has pain in feet
3 - - this is all due to peripheral neuropathy plays volleyball indoors - - it is wood. Will not give up
4 volleyball. Plays 2-3 hrs a day." Respondent notes, further, that Patient A "has anxiety due to
5 dad's death has insomnia as well spoke about the amount of pills and possible liver damage."
6 Respondent's physical exam of Patient A includes a recorded blood pressure of 148/72, and "feet
7 showed abnormalities [bilateral] foot pain tender." The notes provide no indication of which
8 part(s) of the feet were affected. The assessments included chronic pain in the right foot, chronic
9 pain in the left foot, controlled diabetes mellitus, and narcotic dependence.

10 49. From on or about March 23, 2016, in addition to the monthly Norco x 240 tablets as
11 previously mentioned, Patient A started filling prescriptions written by Respondent for 30 x
12 Ativan 1 mg tablets, to be taken one at bedtime.

13 50. Patient A is next seen by Respondent on or about July 21, 2016, when he presents for
14 "follow up of anxiety and medications." Respondent documents the history of present illness
15 (HPI) as "Pt doesn't want colonoscopy - wants the FIT test - - wants Ativan for bedtime.
16 Constant neuropathic pain of [bilateral] feet - - toe!nad @ very numb." Respondent's chart note
17 for this date of service contains no further history. Patient A's blood pressure is recorded as
18 145/86 with a heart rate of 72 beats per minute. No other physical exam is recorded.
19 Respondent's assessment at this visit includes chronic insomnia, anxiety, "history of painful
20 diabetic neuropathy (E11.40); Resolved: 21Jul2016" and "painful diabetic neuropathy (E11.40)."

21 51. On or about March 2, 2017, Patient A again presents to Respondent, for "complaints
22 of medication refill." Respondent's HPI notes include "[p]ain is severe at the bottom of the feet
23 near the metatarsals as well as the dorsum - - has had pain 15-20 yrs - - felt to be neuropathy -
24 tried meds and surgeries due to the severity of the pain - if takes every 4 hours no pain
25 whatsoever then 100% pain not as worse on feet - plays volleyball in hard wood floor gym
26 indoors." Respondent's review of systems is positive for "pain in the lower extremities, pain
27 localized to one or more joints, joint swelling localized to one or more joints and joint stiffness
28 localized to one or more joints." No indication is provided of the specific joint(s) affected.

1 Patient A's blood pressure is recorded as 181/90 at this visit, with a heart rate of 97 beats per
2 minute. The blood pressure measurement was not repeated. Patient A's pain scale is documented
3 as "0/10." Respondent notes that Patient A's "feet showed abnormalities." Respondent's
4 assessments include chronic pain in the right foot, chronic pain in the left foot, narcotic
5 dependence, painful diabetic neuropathy, controlled diabetes mellitus, and hypertension.

6 52. The final documented visit by Patient A is on or about June 7, 2017, when he
7 presented to Respondent for "follow up on medication." The HPI is documented as "has severe
8 peripheral neuropathy [bilateral] feet has tried lyrica but can't take 2 has tried gabapentin and is
9 not effective has tried anti-inflammatory has gastritis so has to rely on hydrocodone and 7-8 a day
10 seem to allow a semblance of normal life liver has been followed." Patient A's blood pressure is
11 recorded at this visit as 148/94, pulse rate 93 beats per minute, and the rest of the vital signs are
12 normal. Patient A's pain scale is documented as "0/10." Respondent's physical exam notes
13 include the following: "both feet with swelling, warmth, dorsal tenderness, plantar tenderness,
14 lateral tenderness and decreased range of motion of toes," and also, "normal appearance, no
15 deformity, no erythema, no tenderness and full range of motion of toes," with "normal bilateral
16 foot strength" and "decreased bilateral foot sensation." Respondent's assessments included
17 chronic pain in the right foot, chronic pain in the left foot, and hypertension.

18 53. Respondent did not conduct foot sensation testing with a monofilament, and did not
19 refer Patient A to a podiatrist or other specialist for evaluation and treatment of his severe diabetic
20 neuropathy.

21 54. Respondent's documented plan for Patient A on or about June 7, 2017, includes
22 "Start: Valsartan 320 mg oral tablet [for blood pressure]..." Valsartan is also included under
23 Patient A's "current meds" at every prior visit. Along with Valsartan (an ARB), Respondent also
24 prescribed Lisinopril (an ACE-inhibitor) to be taken concurrently over the four year period
25 reviewed.

26 55. Respondent did not address Patient A's frequently elevated blood pressures with any
27 recommendations.

28 ////

1 56. During the four year period from 2015 through 2019, Patient A was subjected to only
2 one drug screen test. Respondent did not increase the quantity of Norco he prescribed to Patient
3 A, nor did he document any attempts to taper to lower doses.

4 57. Respondent did not justify in his records the use of long-term benzodiazepines, nor
5 does Patient A's medical chart reflect a discussion about the increased risks of taking opioids and
6 benzodiazepines concurrently.

7 Patient B:

8 58. Patient B is a male person, born in 1928.

9 59. From January 2015 through January 2016, Patient B filled almost monthly
10 prescriptions written by Respondent for 210 x Norco 10/325 tablets.⁵ From February 2016
11 through February 2019, these monthly prescriptions were for 180 tablets. During the months
12 August, September and October 2018, and January 2019, the prescriptions were for 140 tablets.
13 No explanation for the change in monthly prescribing can be found in Patient B's chart.

14 60. During the four year period from 2015 through 2019, Patient B was subjected to only
15 one drug screen test, which proved negative for all substances tested, including opioids.

16 61. On or about January 13, 2015,⁶ Patient B presented to Respondent "for follow up of
17 evaluation of all medication." Respondent's chart note for this visit indicates the HPI as
18 "[patient] wants to take Lasix even in spite of chf sx - - goes every 20 minutes at times - wants
19 change in his potassium." The HPI includes the comment "[patient] does not walk due to arthritis
20 in the knees." The note lists twenty-four (24) "active problems," and contains no mention of the
21 status of any painful condition. The list of "current meds" includes two prescriptions for Norco
22 10/325 and one for potassium chloride ER 10 mEq. Respondent's assessments included "CHF,
23 chronic," hypertension, and gastroesophageal reflux disease (GERD). Respondent's orders on
24 this date include "Klor-Con M20 20 mEq oral tablet Extended Release." The potassium chloride
25 ER 10 mEq is not discontinued.

26
27 ⁵ Patient B's CURES report does not show prescriptions filled during August 2015 and
September 2015.

28 ⁶ January 13, 2015, is the earliest date for which Patient B's medical records were
available.

1 62. On or about February 23, 2015, Patient B presented with "complaints of lightheaded
2 x 1 month" and had also "been experiencing numbness on right hand x 3 months." The note
3 contains no status of any painful condition. The list of "current meds" at this date includes two
4 prescriptions for Norco 10/325, and two prescriptions for potassium chloride. The two Norco
5 10/325 prescriptions and the prescription for Klor-Con M20 20 mEq tablets are discontinued at
6 this visit without explanation.

7 63. On or about March 30, 2015, Patient B visited Respondent for left knee pain
8 following a fall. Under the review of systems, for musculoskeletal Respondent noted "pain in the
9 lower extremities, pain localized to one or more joints, joint swelling localized to one or more
10 joints, and joint stiffness localized to one or more joints." Respondent's assessment was "left
11 knee pain," and he ordered X-rays of that knee.

12 64. On or about April 2, 2015, Patient B presented for follow up of left knee and the
13 results of his X-rays. Under the HPI, Respondent documented that Patient B was "doing well
14 with the exception of his pain in the left knee – cortisone usually helps." Under the review of
15 systems, for musculoskeletal Respondent noted "pain localized to one or more joints, joint
16 swelling localized to one or more joints, and joint stiffness localized to one or more joints - - knee
17 osteoarthritis." Respondent's assessment was osteoarthritis of both knees, and he gave Patient B
18 an intramuscular injection of cortisone.

19 65. On or about April 15, 2015, Patient B saw Respondent "for complaints of L left pain,
20 [patient] also here to discuss insomnia, shortness of breath, and discuss Coumadin." Under HPI,
21 Respondent documents "[patient complains of] pain in the left knee and referred pain to the l
22 thigh - received cortisone shot - it has helped - occurring less frequently - maybe a reaction to the
23 cortisone shot. Also getting INRs done, his level has not changed will give him 2 mg a day x 6
24 days and 3 mg." Respondent's assessments include insomnia, dyspnea, and osteoarthritis of the
25 knees. Also at this visit, Respondent adds a prescription for gabapentin 100 mg at bedtime.

26 66. Patient B returned to Respondent on or about November 23, 2015 for "complaints of
27 L knee pain," and requested a cortisone injection. According to the HPI, Patient B "has had
28 cortisone shot in the past and it worked well – no falls." Respondent's chart note for this date

1 includes two prescriptions for Norco 10/325. No information regarding the Norco prescription(s),
2 or whether the Norco is effective, is provided in the note. Respondent's assessments were
3 chronic pain of the left knee and pharyngoesophageal dysphagia. Respondent referred Patient B
4 to gastroenterology and administered an injection of cortisone into the right deltoid muscle.

5 67. During the period under review, Respondent saw Patient B on a further nine (9)
6 occasions. During these visits, Respondent continues to refill the Norco prescriptions. The notes
7 provide no information on how (or whether) the Norco was helping Patient B's symptoms,
8 whether he had any side effects, or Patient B's activity level.

9 68. On or about May 31, 2017, Respondent documented Patient B's visit in a chart note
10 in which sixty-one (61) "active conditions" were listed, including decubitus ulcer of right heel.
11 The same condition is listed as an active condition in Respondent's notes dated January 24, 2017,
12 and December 15, 2016, though none of these notes includes any physical exam of the right heel,
13 nor any mention of the condition in the HPI or assessments.

14 69. On or about November 15, 2017, the final visit for which a chart note is available,
15 Respondent documents the following observations for Respondent's physical exam of Patient B:
16 "Both hands with deformities, erythema, swelling, warmth, dorsal tenderness, palmar tenderness,
17 tenderness of thenar eminence, tenderness of hypothenar eminence, decreased extension of the
18 fingers and decreased abduction of the fingers," and also, contradictorily, "normal appearance, no
19 tenderness and normal range of motion." Patient B's knee exam provides: "Left knee with
20 swelling, warmth, medial joint line tenderness and lateral joint line tenderness, but normal
21 appearance, no erythema, no ecchymosis, no joint effusion, no joint hypertrophy, no genu
22 valgum, no genu varus, no patellar tendon tenderness, normal range of motion, normal flexion
23 and normal extension." Respondent's assessments include chronic pain syndrome, chronic
24 systolic congestive heart failure, osteoarthritis of both knees and hand arthritis.

25 70. Patient B's chart contains no comment on the inconsistent results of the urine drug
26 screen test, which was negative for opioids on or about November 15, 2017.

27 71. There is no indication in his chart that Respondent followed up on any referral made
28 for Patient B.

Patient C:

72. Patient C is a male person, born in 1987. During the period January 1, 2015, through September 4, 2018, Respondent prescribed the following controlled substances to Patient C:

DATE FILLED	DRUG	STRENGTH	QUANTITY
2015/1/5	CARISOPRODOL	350 MG	60
2015/1/5	ADDERALL XR	30 MG	30

73. Patient C's chart contains a pain management consultation dated July 6, 2011, which states that Patient C likely had opioid-induced hyperalgesia as a result of his high dose opioid therapy, and that inpatient opioid detoxification was recommended at that time. The chart contains no subsequent communications from or to any pain management specialist.

74. Patient C's chart contains a letter by Respondent, dated March 25, 2014, stating that Patient C had then been his patient for five years for a shoulder injury, and was receiving opioid therapy for chronic pain in the left shoulder. Patient C reportedly had two surgeries prior to becoming Respondent's patient. The letter states, further, that Patient C was taking Ambien CR 12.5 mg x 30, Dilaudid 8 mg every 4 – 6 hours as needed for pain x 180, and MS Contin 100 mg every 4 – 6 hours as needed for pain x 120.

75. On or about September 25, 2014, Patient C presented to Respondent "for follow up of medications check." The HPI states that the patient "[complains of] pain still present but [u]nder better control with the meds. Can be worse at times but definitely not out of control. Seeing pain counselor, using cognitive pain management. Meds should remain the same." On this date, Respondent's musculoskeletal review of systems documents "no back pain, no localized joint pain, and no localized joint swelling." The note reveals no physical exam of Patient C's shoulder,

////

1 and no other documentation of the specific location of the pain nor what triggered the pain that
2 Respondent was treating with controlled substances.

3 76. In early 2015, Respondent was prescribing Ambien 12.5 mg for Patient C to take
4 every night. No sleep history is documented, nor does the chart indicate that safer sleep-inducing
5 non-pharmacological and pharmacological alternatives were attempted first.⁷

6 77. In May and June 2016, Respondent was prescribing more than 1000 mg of morphine
7 equivalents to Patient C per day, along with multiple benzodiazepines and Soma, a habit-forming
8 muscle relaxer. Respondent did not seek expert input before escalating Patient C's medications to
9 these quantities.

10 78. On or about September 28, 2016, Patient C presented to Respondent for follow up of
11 chronic pain, needing refills. The HPI for this visit includes the comment by Respondent that
12 Patient C "is 270 lbs and needs [MS Contin Extended Release, one tablet every 4 – 6 hours for
13 pain, quantity 120] for control of the pain. Oxycontin is too expensive. He does not have any
14 side effects with the meds x of constipation." In addition to the MS Contin, Respondent renewed
15 prescriptions for Patient C for oxycodone (240 x 30 mg tablets), zolpidem tartrate (30 x 12.5
16 tablets), and carisoprodol (120 x 350 mg tablets).

17 79. Patient C's chart references no ongoing discussion about his previously documented
18 opioid-induced hyperalgesia.

19 80. Patient C's chart references no discussion of the risks of these high dose opioids or of
20 the combination of opioids and benzodiazepines.

21 81. In 2016, according to a CURES report obtained for Patient C, the last prescription he
22 filled for any opioid, Ambien or Soma, was on or before October 19, 2016.

23 82. On or about December 7, 2016, Respondent documented in Patient C's chart that
24 Patient C had been admitted to Canyon Ridge psychiatric hospital from November 5 through
25 November 11, 2016. The HPI states that Patient C "had a bipolar break – was manic – went to
26 hospital ... he is hyperreligious ... believes he can completely interpret the book of revelation....

27
28 ⁷ Respondent's chart note dated January 5, 2015, includes four prescriptions for Ambien, three for
Oxycodone, and three for MS Contin under "current meds."

1 His mission is to play music convert people and ride dirt bikes..." On or about January 5, 2017,
2 Respondent noted in Patient C's chart that he was taking the antipsychotic, Zyprexa. Respondent
3 discontinued the Zyprexa on or about January 6, 2017.

4 83. On or about January 18, 2017, Patient C presented to Respondent with the complaint
5 that "both ears hurt." The HPI states that Patient C had "tension in the abdominal muscles as well
6 as the back - will use Soma." Respondent's chart note for this visit reveals no physical exam of
7 the Patient C's abdomen or back. At this visit, Respondent restarted Patient C on carisoprodol
8 (120 x 350 mg) "for severe muscle spasm."

9 84. Respondent's chart note for Patient C, dated March 20, 2017, lists two prescriptions
10 for carisoprodol 350 mg tablets under "current meds." The HPI states Patient C "is still feeling
11 well - has mild anxiety or may be due to the lack of opioids in the system - he will not start
12 again." The chart note contains no documentation of Patient C's sleep history. Respondent
13 ordered Ambien 12.5 mg CR for bedtime, and gabapentin for pain.

14 85. On or about March 30, 2017, Respondent documented in Patient C's chart that he was
15 "not doing as well - has had physical anxiety [probably] related to the post withdrawal of pain
16 meds." Respondent's psychological system review documents "[a]nxiety. No depression and a
17 desire to continue living. No disturbing or unusual thoughts, feelings, or sensations and not
18 crying for no reason." Other than anxiety, no psychiatric symptoms are mentioned in the chart
19 note. Respondent prescribed alprazolam 1 mg (three times daily), as well as Zoloft 50 mg one
20 daily.

21 86. On or about April 18, 2017, Patient C presented with "complaints of withdrawal
22 symptoms." Respondent's notes in the HPI include that Patient C "feels he is in opiate
23 withdrawals - feels sick somewhat nauseated sometimes vomiting - - constant anxiety to the point
24 can't think straight - can't concentrate hardly at all mom had a few painkillers in the cabinet took
25 norco 10/325 all at one time didn't touch the anxiety - the tolerance is very high - had some pain
26 but minimal - doesn't want pain meds." Respondent's assessment for this visit was "withdrawal
27 symptoms drug or narcotic." Under the heading "[d]iscussed," Respondent documented, "will
28 plan to decrease the med slowly to avoid the withdrawal effect which seems to be delayed every

1 month we will decrease the dosage.” After an apparent six month hiatus from prescribing opioids
2 to Patient C, Respondent restarted Patient C on oxycodone 30 mg x 90 tablets, and Norco 10/325
3 mg, 1 tablet twice daily⁸ for what he regarded as the manifestation of opiate withdrawal
4 symptoms. Respondent did not re-refer Patient C to a pain management specialist.

5 87. On or about April 27, 2017, Patient C presented to Respondent “to discuss
6 medications. Still having the sx of withdrawal placed back on med but the dosage is way too low
7 to prevent the sx his tolerance is too high for the meds has mild pain in the right shoulder but not
8 severe at this point.” Under HPI, Respondent included “as above he has noticed irritability has
9 noted severe anxiety that manifest itself as going from hot to col[d] and severe anxiety this is not
10 surprising due to coming off meds which he had taken regularly for 7 yrs at the snap of the
11 finger.” Patient C’s current meds were listed as alprazolam, Soma (two prescriptions listed),
12 gabapentin, Norco, oxycodone, sertraline and Ambien. The chart note contains no psychiatric or
13 sleep-related systems review. Respondent noted “[o]ur plan is to wean slowly off the pain med so
14 as not to have the withdrawal which is now manifesting after complete sudden cessation of the
15 pain meds.” His orders on this date were for Patient C to stop Soma and Norco and double his
16 dose of oxycodone to two 30 mg tablets, three times a day. The alprazolam prescription was also
17 renewed.

18 88. Respondent did not refer Patient C to a psychiatrist for management of his psychiatric
19 symptoms. The chart contains no indication that Respondent assessed Patient C’s treatment
20 response to Zoloft.

21 89. Respondent did not follow up on the recommendations of the pain management
22 specialist, made in 2011, that Patient C needed inpatient detoxification for his opioid-induced
23 hyperalgesia, nor did Respondent attempt a slow taper of opioids in primary care.

24 90. Patient C’s chart contains one urine drug screening dated January 5, 2018, in which
25 the prescribed medications are listed as alprazolam, hydrocodone, oxycodone and morphine. The
26 screen was negative for oxycodone, hydrocodone, and alprazolam. There is no indication in
27 Patient C’s chart that Respondent followed up on this apparently inconsistent drug screen result.

28 ⁸ Current medications at this visit include two prescriptions for carisoprodol.

Patient D:

91. Patient D is a female person, born in 1955.

92. During the period January 13, 2014, through November 9, 2014, Respondent prescribed Adderall 20 mg x 60 tablets to Patient D on six occasions, and alprazolam .25 mg x 90 tablets on two occasions. Respondent also prescribed a four-day supply of Iophen-C NR, a cough mixture containing codeine, on one occasion during this period, and again on or about October 19, 2016, and on or about February 26, 2017.

93. Respondent's medical chart for Patient D consists of a single progress note with a date of service of February 26, 2017. The note contains no recorded vital signs, no documented physical examination, no assessments, and no treatment plan for Patient D.

94. Patient D's medical chart documents no medical indication for any of the controlled substances prescribed, the status of Patient D's conditions, any side effects, or Patient D's response to treatment. There is similarly no documentation to support the diagnosis of ADD/ADHD, and no documentation of any social impairments or justification of medication treatment.

Patient E:

95. Patient E is a male person born in 1980.

96. Between March 14, 2014, and February 10, 2017, Respondent issued the following prescriptions to Patient E:

DATE FILLED	DRUG	STRENGTH	QUANTITY
2014/3/14	ALPRAZOLAM	.25 MG	90
2014/8/11	VYVANSE	40 MG	30
2014/10/9	VYVANSE	40 MG	30
2014/12/6	AMPHETAMINE SALT COMBO	20 MG	60
2015/2/17	VYVANSE	40 MG	30
2015/4/1	VYVANSE	40 MG	30
2015/5/8	VYVANSE	40 MG	30
2015/7/1	VYVANSE	40 MG	30
2015/8/18	VYVANSE	40 MG	30
2015/12/28	VYVANSE	40 MG	30
2016/2/1	VYVANSE	40 MG	30
2016/6/15	ALPRAZOLAM	.25 MG	60
2016/8/9	ALPRAZOLAM	.25 MG	60
2017/2/10	ALPRAZOLAM	.25 MG	60

1 97. Respondent's medical chart for Patient E contains only two progress notes, dated
2 October 8, 2014, and March 26, 2015, respectively.

3 98. Respondent's note dated October 8, 2014, states Patient E "presents today for
4 complaints of medication." The HPI includes an assessment for ADD/ADHD. Vyvanse 40 mg is
5 listed under "current meds." Respondent's note for this date includes a negative review of
6 systems and a physical examination of Patient E. Patient E's vital signs are within normal limits.
7 Respondent's assessment was "ADD (attention deficit hyperactivity disorder, inattentive type)."

8 99. The note dated March 26, 2015, indicates ADD as an active problem. The list of
9 "current meds" includes three prescriptions for Vyvanse 40 mg, and one for Adderall 20 mg. The
10 note contains no history of present illness, no vital signs nor any physical examination. Similarly,
11 there is no current assessment section and Respondent's orders are to "renew amphetamine-
12 dextroamphetamine 20 mg tablet (Adderall); take 1 tablet twice daily..."

13 **FIRST CAUSE FOR DISCIPLINE**

14 **(Gross Negligence)**

15 100. Respondent has subjected his Physician's and Surgeon's Certificate No. G 35907 to
16 disciplinary action under sections 2227 and 2234, as defined by section 2234, subdivision (b), of
17 the Code, in that he committed gross negligence in his care and treatment of Patient A, Patient B,
18 Patient C, Patient D, and Patient E, as more particularly alleged hereafter:

19 Patient A:

20 a. Respondent failed to treat Patient A's hypertension appropriately, in that he failed to
21 address Patient A's elevated blood pressures with any recommendation, did not keep clear
22 documentation about Patient A's anti-hypertensive program, and maintained Patient A on an
23 ARB with concurrent use of an ACE-inhibitor, among others.

24 b. Respondent failed to evaluate Patient A's severe diabetic neuropathy, including his
25 failure to document accurate physical examinations, not conducting foot sensation testing with a
26 monofilament, and not referring Patient A to a podiatrist or other specialist for evaluation and
27 treatment, among others.

28 ////

1 Patient B:

2 c. Respondent failed to maintain substantial compliance with appropriate controlled
3 substance prescribing practices, including his failure to document the status of Patient B's painful
4 conditions, the condition for which Patient B was taking Norco and whether (or how much) it was
5 ameliorating his pain and/or whether Patient B enjoyed any functional improvement as a result of
6 taking controlled substances, the failure to try safer treatment alternatives first, the failure to
7 follow up on the inconsistent urine drug screen, and the failure to document an explanation for the
8 monthly quantity changes in Norco, among others.

9 Patient C:

10 d. Respondent failed to maintain substantial compliance with appropriate controlled
11 substance prescribing practices, including that he prescribed controlled substances without any
12 indication that non-controlled substances or other modalities of treatment had been attempted
13 first, failed to make appropriate referrals, failed to warn Patient C of the risks of combining
14 benzodiazepines and opioids, failed to conduct and/or document physical and other exams to
15 justify the high doses of controlled substances Patient C was receiving, and failed to follow-up on
16 the inconsistent drug screen test, among others.

17 e. Respondent failed to ensure proper treatment for a patient with a history of psychotic
18 symptoms.

19 Patient D:

20 f. Respondent failed to maintain adequate and accurate records for his care and
21 treatment of Patient D.

22 g. Respondent failed to appropriately evaluate and manage Patient D's reported
23 ADD/ADHD.

24 Patient E:

25 h. Respondent failed to maintain adequate and accurate records for his care and
26 treatment of Patient E.

27 ////

28 ////

SECOND CAUSE FOR DISCIPLINE

(Repeated Negligent Acts)

101. Respondent has further subjected his Physician's and Surgeon's Certificate No. G 35907 to disciplinary action under sections 2227 and 2234, as defined by section 2234, subdivision (c), of the Code, in that he committed repeated negligent acts in his care and treatment of Patient A, Patient B, Patient C, Patient D, and Patient E, as more particularly alleged hereafter:

102. Paragraphs 36 through 99, above, are incorporated by reference and re-alleged as if fully set forth herein.

Patient A:

a. Respondent failed to treat Patient A's hypertension appropriately, in that he failed to address Patient A's elevated blood pressures with any recommendation, did not keep clear documentation about Patient A's anti-hypertensive program, and maintained Patient A on an ARB with concurrent use of an ACE-inhibitor, among others.

b. Respondent failed to evaluate Patient A's severe diabetic neuropathy by failing to document accurate physical examinations, not conducting foot sensation testing with a monofilament, and not referring Patient A to a podiatrist or other specialist for evaluation and treatment, among others.

c. Respondent failed to maintain substantial compliance with controlled substances prescribing guidelines, including that he failed to assess Patient A regularly during office visits, failed to justify in his records the use of long-term benzodiazepines, and failed to document a discussion with Patient A regarding the increased risks of taking opioids and benzodiazepines concurrently, among others.

Patient B:

d. Respondent failed to maintain substantial compliance with appropriate controlled substance prescribing practices, including his failure to document the status of Patient B's painful conditions, the condition for which Patient B was taking Norco and whether (or how much) it was ameliorating his pain and/or whether Patient B enjoyed any functional improvement as a result of

1 taking controlled substances, the failure to try safer treatment alternatives first, the failure to
2 follow up on the inconsistent urine drug screen, and the failure to document an explanation for the
3 monthly quantity changes in Norco, among others.

4 e. Respondent failed to maintain adequate and accurate records.

5 Patient C:

6 f. Respondent failed to be in substantial compliance with appropriate controlled
7 substance prescribing practices, including that he prescribed controlled substances without any
8 indication that non-controlled substances or other modalities of treatment had been attempted
9 first, failed to make appropriate referrals, failed to warn Patient C of the risks of combining
10 benzodiazepines and opioids, failed to conduct and/or document physical and other exams to
11 justify the high doses of controlled substances Patient C was receiving, and failed to follow-up on
12 the inconsistent drug screen test, among others.

13 g. Respondent failed to ensure proper treatment for a patient with a history of psychotic
14 symptoms.

15 Patient D:

16 h. Respondent failed to maintain adequate and accurate records for his care and
17 treatment of Patient D.

18 i. Respondent failed to appropriately evaluate and manage Patient D's reported
19 ADD/ADHD.

20 Patient E:

21 j. Respondent failed to maintain adequate and accurate records for his care and
22 treatment of Patient E.

23 **THIRD CAUSE FOR DISCIPLINE**

24 **(Failure to Maintain Adequate and Accurate Records)**

25 103. Respondent has further subjected his Physician's and Surgeon's Certificate No.
26 G 35907 to disciplinary action under sections 2227 and 2234, as defined by section 2266, of the
27 Code, in that he failed to maintain adequate and accurate records relating to the provision of
28 services to Patient A, Patient B, Patient C, Patient D, and Patient E. The circumstances are set

1 forth in paragraphs 36 through 99, above, which are hereby incorporated by reference and
2 realleged as if fully set forth herein.

3 **FOURTH CAUSE FOR DISCIPLINE**

4 **(General Unprofessional Conduct)**

5 104. Respondent has further subjected his Physician's and Surgeon's Certificate No.
6 G 35907 to disciplinary action under sections 2227 and 2234 of the Code, in that he has engaged
7 in conduct which breaches the rules or ethical code of the medical profession, or conduct which is
8 unbecoming to a member in good standing of the medical profession as more particularly alleged
9 herein:

10 105. Paragraphs 36 through 103, above, are hereby incorporated by reference and re-
11 alleged as if fully set forth herein.

12 106. Respondent treated two family members with controlled substances on multiple
13 occasions in non-emergent circumstances.

14 **PRAYER**

15 WHEREFORE, Complainant requests that a hearing be held on the matters herein alleged,
16 and that following the hearing, the Medical Board of California issue a decision:

17 1. Revoking or suspending Physician's and Surgeon's Certificate Number G 35907,
18 issued to Respondent Royce Lewis Hutain, M.D.;

19 2. Revoking, suspending or denying approval of Respondent Royce Lewis Hutain,
20 M.D.'s authority to supervise physician assistants and advanced practice nurses;

21 3. Ordering Respondent Royce Lewis Hutain, M.D., if placed on probation, to pay the
22 Board the costs of probation monitoring; and

23 4. Taking such other and further action as deemed necessary and proper.
