

BEFORE THE
MEDICAL BOARD OF CALIFORNIA
DEPARTMENT OF CONSUMER AFFAIRS
STATE OF CALIFORNIA

In the Matter of the Accusation
Against

Guido James Gores, Jr., M.D.

Physician's and Surgeon's
Certificate No. G 61254

Respondent.

Case No. 800-2017-032089

DECISION

The attached Stipulated Surrender of License and Order is hereby adopted as the Decision and Order of the Medical Board of California, Department of Consumer Affairs, State of California.

This Decision shall become effective at 5:00 p.m. on February 10, 2021.

IT IS SO ORDERED February 3, 2021.

MEDICAL BOARD OF CALIFORNIA

William Prasifka
Executive Director

12 In the Matter of the Accusation Against:

13 **GUIDO JAMES GORES, JR., M.D.**

14 **909 Hyde St., Ste 125**
15 **San Francisco, CA 94109-4832**

16 **Physician's and Surgeon's**
17 **Certificate No. G 61254**

18 Respondent.

Case No. 800-2017-032089

OAH No. 2020040265

19 **STIPULATED SURRENDER OF**
20 **LICENSE AND ORDER**

21 IT IS HEREBY STIPULATED AND AGREED by and between the parties to the above-
22 entitled proceedings that the following matters are true:

23 **PARTIES**

24 1. William Prasifka (Complainant) is the Executive Director of the Medical Board of
25 California (Board). He brought this action solely in his official capacity and is represented in this
26 matter by Xavier Becerra, Attorney General of the State of California, by David Carr, Deputy
27 Attorney General.
28

2. Guido James Gores, Jr., M.D. is represented in this proceeding by attorney James J. Zenere, Sheuerman, Martini, Tabari, Zenere & Gavin, 1033 Willow St., San Jose, California 95125.

3. On or about September 8, 1987, the Board issued Physician's and Surgeon's Certificate No. G 61254 to Guido James Gores, Jr., M.D. (Respondent). The Physician's and Surgeon's Certificate was in full force and effect at all times relevant to the charges brought in Accusation No. 800-2017-032089 and will expire on July 31, 2021, unless renewed.

JURISDICTION

4. Accusation No. 800-2017-032089 was filed before the Board, and is currently pending against Respondent. The Accusation and all other statutorily required documents were properly served on Respondent on May 8, 2019. Respondent timely filed his Notice of Defense contesting the Accusation. A copy of Accusation No. 800-2017-032089 is attached as Exhibit A and incorporated by reference.

ADVISEMENT AND WAIVERS

5. Respondent has carefully read, fully discussed with counsel, and understands the charges and allegations in Accusation No. 800-2017-032089. Respondent also has carefully read, fully discussed with counsel, and understands the effects of this Stipulated Surrender of License and Order.

6. Respondent is fully aware of his legal rights in this matter, including the right to a hearing on the charges and allegations in the Accusation; the right to confront and cross-examine the witnesses against him; the right to present evidence and to testify on his own behalf; the right to the issuance of subpoenas to compel the attendance of witnesses and the production of documents; the right to reconsideration and court review of an adverse decision; and all other rights accorded by the California Administrative Procedure Act and other applicable laws.

7. Respondent voluntarily, knowingly, and intelligently waives and gives up each and every right set forth above.

///

///

1 **CULPABILITY**

2 8. Respondent understands that the charges and allegations in Accusation No. 800-2017-
3 032089, if proven at a hearing, constitute cause for imposing discipline upon his Physician's and
4 Surgeon's Certificate.

5 9. For the purpose of resolving the Accusation without the expense and uncertainty of
6 further proceedings, Respondent agrees that, at a hearing, Complainant could establish a factual
7 basis for the charges in the Accusation and that those charges constitute cause for discipline.
8 Respondent hereby gives up his right to contest that cause for discipline exists based on those
9 charges.

10 10. Respondent understands that by signing this stipulation, he enables the Board to issue
11 an order accepting the surrender of his Physician's and Surgeon's Certificate without further
12 process.

13 **RESERVATION**

14 11. The admissions made by Respondent herein are only for the purposes of this
15 proceeding, or any other proceedings in which the Medical Board of California or other
16 professional licensing agency is involved, and shall not be admissible in any other criminal or
17 civil proceeding.

18 **CONTINGENCY**

19 12. This stipulation shall be subject to approval by the Board. Respondent understands
20 and agrees that counsel for Complainant and the staff of the Board may communicate directly
21 with the Board regarding this stipulation and surrender, without notice to or participation by
22 Respondent or his counsel. By signing the stipulation, Respondent understands and agrees that he
23 may not withdraw his agreement or seek to rescind the stipulation prior to the time the Board
24 considers and acts upon it. If the Board fails to adopt this stipulation as its Decision and Order,
25 the Stipulated Surrender and Disciplinary Order shall be of no force or effect, except for this
26 paragraph, it shall be inadmissible in any legal action between the parties, and the Board shall not
27 be disqualified from further action by having considered this matter.
28

1 ACCEPTANCE

2 I have carefully read the above Stipulated Surrender of License and Order and have fully
3 discussed it with my attorney, James J. Zenere. I understand the stipulation and the effect it will
4 have on my Physician's and Surgeon's Certificate. I enter into this Stipulated Surrender of
5 License and Order voluntarily, knowingly, and intelligently and agree to be bound by the
6 Decision and Order of the Medical Board of California.

7
8 DATED:

12/16/2020

GUIDO JAMES GORES, JR., M.D.
Respondent

11 I have read and fully discussed with Respondent Guido James Gores, Jr., M.D. the terms
12 and conditions and other matters contained in this Stipulated Surrender of License and Order. I
13 approve its form and content.

14 DATED:

December 16, 2020

JAMES J. ZENERE
Attorney for Respondent

17 ENDORSEMENT

18 The foregoing Stipulated Surrender of License and Order is hereby respectfully submitted
19 for consideration by the Medical Board of California of the Department of Consumer Affairs.

20
21 DATED:

12/17/2020

Respectfully submitted,

XAVIER BECERRA
Attorney General of California
MARY CAIN-SIMON
Supervising Deputy Attorney General

DAVID CARR

11 **STATE OF CALIFORNIA**

12 In the Matter of the Accusation Against:

Case No. 800-2017-032089

13 **GUIDO JAMES GORES, JR., M.D.**

A C C U S A T I O N

14 909 Hyde St., Suite 125
15 San Francisco, CA 94109-4832

16 Physician's and Surgeon's
17 Certificate No. G 61254,

18 Respondent.
19
20

21 Complainant alleges:

22 **PARTIES**

23 1. Kimberly Kirchmeyer (Complainant) brings this Accusation solely in her official
24 capacity as the Executive Director of the Medical Board of California, Department of Consumer
25 Affairs (Board).

26 2. On or about September 8, 1987, the Medical Board issued Physician's and Surgeon's
27 Certificate Number G 61254 to Guido James Gores, Jr., M.D. (Respondent). The Physician's and
28

1 Surgeon's Certificate was in full force and effect at all times relevant to the charges brought
2 herein and will expire on July 31, 2021, unless renewed.

3 JURISDICTION

4 3. This Accusation is brought before the Board, under the authority of the following
5 laws. All section references are to the Business and Professions Code unless otherwise indicated.

6 4. Section 2004 of the Code states:

7 "The board shall have the responsibility for the following:

8 "(a) The enforcement of the disciplinary and criminal provisions of the Medical Practice
9 Act.

10 "(b) The administration and hearing of disciplinary actions.

11 "(c) Carrying out disciplinary actions appropriate to findings made by a panel or an
12 administrative law judge.

13 "(d) Suspending, revoking, or otherwise limiting certificates after the conclusion of
14 disciplinary actions.

15 "(e) Reviewing the quality of medical practice carried out by physician and surgeon
16 certificate holders under the jurisdiction of the board.

17 "(f) Approving undergraduate and graduate medical education programs.

18 "(g) Approving clinical clerkship and special programs and hospitals for the programs in
19 subdivision (f).

20 "(h) Issuing licenses and certificates under the board's jurisdiction.

21 "(i) Administering the board's continuing medical education program."

22 5. Section 2001.1 of the Code provides that the Board's highest priority shall be public
23 protection.

24 6. Section 2227 of the Code states:

25 "(a) A licensee whose matter has been heard by an administrative law judge of the Medical
26 Quality Hearing Panel as designated in Section 11371 of the Government Code, or whose default
27 has been entered, and who is found guilty, or who has entered into a stipulation for disciplinary
28 action with the board, may, in accordance with the provisions of this chapter:

1 “(1) Have his or her license revoked upon order of the board.

2 “(2) Have his or her right to practice suspended for a period not to exceed one year upon
3 order of the board.

4 “(3) Be placed on probation and be required to pay the costs of probation monitoring upon
5 order of the board.

6 “(4) Be publicly reprimanded by the board. The public reprimand may include a
7 requirement that the licensee complete relevant educational courses approved by the board.

8 “(5) Have any other action taken in relation to discipline as part of an order of probation, as
9 the board or an administrative law judge may deem proper.

10 “(b) Any matter heard pursuant to subdivision (a), except for warning letters, medical
11 review or advisory conferences, professional competency examinations, continuing education
12 activities, and cost reimbursement associated therewith that are agreed to with the board and
13 successfully completed by the licensee, or other matters made confidential or privileged by
14 existing law, is deemed public, and shall be made available to the public by the board pursuant to
15 Section 803.1.”

16 7. Section 2234 of the Code, states:

17 “The board shall take action against any licensee who is charged with unprofessional
18 conduct. In addition to other provisions of this article, unprofessional conduct includes, but is not
19 limited to, the following:

20 “(a) Violating or attempting to violate, directly or indirectly, assisting in or abetting the
21 violation of, or conspiring to violate any provision of this chapter.

22 “(b) Gross negligence.

23 “(c) Repeated negligent acts. To be repeated, there must be two or more negligent acts or
24 omissions. An initial negligent act or omission followed by a separate and distinct departure from
25 the applicable standard of care shall constitute repeated negligent acts.

26 “(1) An initial negligent diagnosis followed by an act or omission medically appropriate for
27 that negligent diagnosis of the patient shall constitute a single negligent act.

28

1 “(2) When the standard of care requires a change in the diagnosis, act, or omission that
2 constitutes the negligent act described in paragraph (1), including, but not limited to, a
3 reevaluation of the diagnosis or a change in treatment, and the licensee’s conduct departs from the
4 applicable standard of care, each departure constitutes a separate and distinct breach of the
5 standard of care.

6 “...”

7 8. Section 4022 of the Code defines “dangerous drug” to include any drug unsafe for
8 self-use and includes all drugs which can only be lawfully dispensed by prescription.

9 9. Section 2266 of the Code states: “The failure of a physician and surgeon to maintain
10 adequate and accurate records relating to the provision of services to their patients constitutes
11 unprofessional conduct.”

12 10. The acts alleged herein occurred in California.

13 **FIRST CAUSE FOR DISCIPLINE**

14 **(Gross Negligence/Repeated Negligence—Patient One)**

15 11. Respondent is subject to disciplinary action in that his care and treatment of Patient
16 One¹ includes departures from the standard of care constituting gross negligence in violation of
17 section 2234(b) or, in conjunction with the additional allegations herein, repeated negligent acts
18 in violation of section 2234(c). The circumstances are as follows:

19 12. Patient One’s first documented office visit with Respondent occurred on January 6,
20 2010. Patient One told Respondent that he had just moved to California and was seeking
21 continuing care for chronic back pain consequent to a fall, for which he had been receiving
22 oxymorphone² and carisoprodol³, and for his Attention Deficit Disorder, for which he had been

23 ¹ The patients discussed herein are referred to as Patient One through Patient Five to
24 preserve patient confidentiality. The patients’ full names will be provided to Respondent upon
request.

25 ² Oxymorphone hydrochloride (trade name Opana) is a semi-synthetic opioid analgesic.
26 Oxymorphone hydrochloride a dangerous drug as defined in section 4022 and a Schedule II
27 controlled substance and narcotic as defined by section 11055, subdivision (b)(1) of the Health
and Safety Code. Oxymorphone hydrochloride has a central nervous system depressant effect and
patients should be cautioned about the simultaneous ingestion of alcohol and other central
nervous system depressant drugs during treatment.

28 ³ Carisoprodol is a muscle-relaxant and sedative. It is a dangerous drug as defined in

1 taking Adderall.⁴ Respondent's chart notes reflect that he prescribed oxycodone⁵ to Patient One
2 at this initial office visit, rather than the previously-prescribed oxymorphone, at the patient's
3 request.

4 13. Over the course of the next two years, Respondent regularly re-prescribed opiates
5 (oxycodone and oxycontin⁶) and carisopridol for Patient One's chronic pain and Adderall for the
6 patient's Attention Deficit Disorder. There is no documentation in Respondent's records of his
7 care of Patient One that Respondent performed a focused examination of the patient's back in
8 evaluating the patient's chronic back pain.

9 14. Respondent's last office visit with Patient One occurred on May 7, 2012. At that
10 visit, Respondent charted that Patient One was complaining of neck pain in addition to the
11 continuing complaint of back pain. Respondent's chart entries note an unremarkable visit aside
12 from examining Patient One's neck in response to the new neck pain complaint and noting the
13 chronic back pain. After two years of continual prescribing of opiates for Patient One's chronic
14 back pain, Respondent did not refer Patient One to a chronic pain specialist or spine specialist.
15 After prescribing Adderall consistently to Patient One for two years for the patient's claimed
16 Attention Deficit Disorder, Respondent did not refer Patient One to a psychiatrist for clinical
17 assessment and treatment of this psychological condition. Respondent refilled Patient One's
18 prescriptions for Adderall at a dosage level of 92 mg. per day, for carisoprodol, and for 200
19 tablets of oxycodone 30 mg, which averages as a daily dose of 300 morphine milligram

20 section 4022. Since the effects of carisoprodol and alcohol or carisoprodol and other central
21 nervous system depressants or psychotropic drugs may be additive, appropriate caution should be
22 exercised with patients who take more than one of these agents simultaneously.

23 ⁴ Adderall, a trade name for mixed amphetamine salts, is a dangerous drug as defined in
24 section 4022 and a schedule II controlled substance as defined by section 11055 of the Health and
25 Safety Code.

26 ⁵ Oxycodone is a semisynthetic narcotic analgesic with multiple actions qualitatively
27 similar to those of morphine. It is a dangerous drug as defined in section 4022 and a schedule II
28 controlled substance and narcotic as defined by section 11055, subdivision (b)(1) of the Health
and Safety Code. Oxycodone can produce drug dependence of the morphine type and, therefore,
has the potential for being abused.

⁶ Oxycontin is a trade name for oxycodone hydrochloride controlled-release tablets.
Oxycodone is a white odorless crystalline powder derived from the opium alkaloid, thebaine.
Oxycodone is a dangerous drug as defined in section 4022 and a schedule II controlled substance
and narcotic as defined by section 11055, subdivision (b)(1) of the Health and Safety Code.
Respiratory depression is the chief hazard from all opioid medications.

1 equivalent (MME). A review of prescribing records reveals that Patient One was being
2 concurrently prescribed opiates by other prescribers as well in this same time period. There is no
3 indication in Respondent's medical records that he made inquiry as to whether Patient One was
4 being prescribed opiates or other controlled substances by any other care provider concurrently
5 with Respondent's prescribing, nor any documentation that Respondent attempted to coordinate
6 his prescribing and care with any other provider.

7 15. On May 23, 2012, Patient One was seen at a critical care hospital emergency
8 department for shortness of breath; he was found to be suffering from a streptococcus infection.
9 Toxicology tests were positive for amphetamine, heroin, cannabinoids, and opiates. He was
10 admitted to the intensive care unit for treatment but developed multiple organ failure and died on
11 May 25, 2012. A post-mortem report listed Patient One's cause of death as "acute mixed drug
12 intoxication..." and septic complications.

13 16. Respondent is subject to disciplinary action in that his failure--after two years of
14 prescribing carisoprodol, Adderall, and high doses of opiates in combination--to have referred
15 Patient One to a specialist in chronic pain and to a psychiatrist for Attention Deficit Disorder was
16 a departure from the standard of care constituting gross negligence in violation of section 2234(b)
17 or, in conjunction with the additional allegations herein, repeated negligent acts in violation of
18 section 2234(c).

19 SECOND CAUSE FOR DISCIPLINE

20 (Gross Negligence/ Repeated Negligence—Patient One)

21 17. The allegations of paragraphs 12 through 15 above are incorporated by reference as if
22 set out in full. Respondent's license is subject to disciplinary action in that his prescribing of high
23 doses of narcotic medication, in combination with carisoprodol and high doses of Adderall, for a
24 prolonged period to Patient One was a departure from the standard of care constituting gross
25 negligence in violation of section 2234(b) or, in conjunction with the additional allegations
26 herein, repeated negligent acts in violation of section 2234(c).

27 ///

28 ///

1 **THIRD CAUSE FOR DISCIPLINE**

2 **(Failure to Maintain Adequate Medical Records—Patient One)**

3 18. The allegations of paragraphs 12 through 15 above are incorporated by reference as if
4 set out in full. Respondent's license is subject to disciplinary action in that his failure to maintain
5 adequate and accurate medical records of his care and treatment of Patient One constitutes
6 unprofessional conduct by application of section 2266.

7 **FOURTH CAUSE FOR DISCIPLINE**

8 **(Gross Negligence/Repeated Negligence—Patient One)**

9 19. The allegations of paragraphs 12 through 15 above are incorporated by reference as if
10 set out in full. Respondent's license is subject to disciplinary action in that his failure to
11 effectively monitor Patient One's use of prescribed opiates and Adderall by periodic toxicology
12 screening was a departure from the standard of care constituting gross negligence in violation of
13 section 2234(b) or, in conjunction with the additional allegations herein, repeated negligent acts
14 in violation of section 2234(c).

15 **FIFTH CAUSE FOR DISCIPLINE**

16 **(Gross Negligence/Repeated Negligence—Patient Two)**

17 20. Respondent is subject to disciplinary action in that his care and treatment of Patient
18 Two includes departures from the standard of care constituting gross negligence in violation of
19 section 2234(b) or, in conjunction with the additional allegations herein, repeated negligent acts
20 in violation of section 2234(c). The circumstances are as follows:

21 21. Respondent first saw Patient Two at an initial office visit on March 17, 2015, for a
22 primary complaint of left hip pain. Patient Two stated that he was scheduled for a left hip
23 replacement within the coming months; his right hip had been successfully replaced some years
24 earlier. Patient Two stated also that he had been seen the prior month in a local critical care
25 emergency room for an apparent seizure. Patient Two related that he had a history of seizures
26 which he stated had been attributed to alcohol withdrawal. Respondent ordered lab tests and
27 conducted a physical examination which did not include an examination of Patient Two's hip. To
28

1 address the patient's complaint of hip pain, Respondent prescribed hydrocodone⁷ for Patient Two
2 at this office visit.

3 22. Patient Two returned on April 10, 2015. He informed Respondent that he was
4 scheduled for a left hip replacement in May; Patient Two reported that he now needed ten
5 hydrocodone tablets daily for the pain. Respondent discussed risks and side effects of narcotics
6 with Patient Two. Respondent then switched Patient Two's pain prescription from hydrocodone
7 to oxycodone.

8 23. At the next office visit on April 28, 2015, Respondent conducted a pre-operative
9 clearance examination on Patient Two and deemed him eligible for the hip-replacement surgery.
10 Respondent referred Patient Two to a neurologist for consultation regarding the February seizure
11 episode. At this visit Respondent also increased Patient Two's oxycodone daily dose by 50%.
12 Respondent did not see Patient Two or prescribe for him for the following eleven months.

13 24. Respondent's chart notes indicate the next office visit with Patient Two occurred on
14 April 18, 2016. Patient Two was requesting a pre-surgical examination for a procedure on his left
15 ear scheduled for later that month. Patient Two also complained of periodic anxiety, for which he
16 requested medication. Respondent performed the pre-surgery examination and pronounced
17 Patient Two fit for surgery; Respondent also prescribed alprazolam⁸ to be taken as needed for
18 anxiety, along with the continuing prescription for oxycodone. There is a passing reference
19 indicating that the patient has had both hips replaced, but no documentation that Respondent
20 inquired about the most recent hip surgery's effect and whether it would allow a decrease in the
21 amount of pain medication Respondent was prescribing.

22
23 ⁷ Hydrocodone is a semisynthetic narcotic analgesic compounded with acetaminophen; it
24 is a dangerous drug as defined in section 4022 and a Schedule III controlled substance as defined
25 by section 11056, subdivision (e) of the Health and Safety Code. Prolonged use of hydrocodone
may result in psychological and physical dependence.

26 ⁸ Alprazolam (trade name Xanax) is a medication of the benzodiazepine class of central
27 nervous system-active compounds. Xanax is used for the management of anxiety disorders or for
28 the short-term relief of the symptoms of anxiety. It is a dangerous drug as defined in section 4022
and a schedule IV controlled substance and narcotic as defined by section 11057, subdivision (d)
of the Health and Safety Code. Xanax has a central nervous system depressant effect and patients
should be cautioned about the simultaneous ingestion of alcohol and other CNS depressant drugs
during treatment with Xanax.

1 25. At the next office visit on June 28, 2016, Respondent noted that Patient Two may be
2 suffering from bipolar disorder or attention deficit disorder and that he was reportedly seeing a
3 therapist. Patient Two also stated that the oxycodone prescribed was effectively controlling his
4 pain. Respondent refilled the prescription to Patient Two for alprazolam and oxycodone.

5 26. When Patient Two returned to Respondent's office on August 24, 2016, he informed
6 Respondent he was seeing a psychiatrist. Respondent contacted the psychiatrist and it was agreed
7 among the three that the psychiatrist, and not Respondent, would prescribe the alprazolam or
8 other anti-anxiety medication to Patient Two. At an office visit just two weeks later, on
9 September 7, 2016, Patient Two told Respondent that he had terminated his treatment with the
10 psychiatrist because the psychiatrist recommended that no benzodiazepines be prescribed to
11 Patient Two. Nonetheless, Respondent agreed to prescribe the benzodiazepine (alprazolam)
12 Patient Two was requesting. Respondent also discussed Patient Two's complaint of possible
13 attention deficit disorder and began a trial of Adderall to address the symptoms Patient Two
14 described.

15 27. At subsequent office visits over the next nine months, Respondent's chart entries note
16 that Patient Two was doing well on the Adderall and alprazolam. Respondent regularly re-filled
17 Patient Two's prescriptions for both medications, as well as the prescription for oxycodone;
18 Respondent stated in an interview with Board investigators that Patient Two was an avid surfer
19 who sometimes injured himself and frequently required pain medication.

20 28. Respondent's chart entry for the office visit on June 9, 2017, notes a discussion with
21 the patient regarding a telephone call Respondent received from one of Patient Two's family
22 members, in which the family member voiced concerns with Patient Two's use of the medications
23 he was receiving. Respondent recorded Patient Two's reply as attributing the family member's
24 concerns to Patient Two's behavioral and mood issues primarily related to alcohol use; Patient
25 Two told Respondent that he was not presently using alcohol and intended to refrain from doing
26 so in the future. A separate treatment record dated July 9, 2017, found in Respondent's medical
27 records, described emergency care provided to Patient Two for sudden onset of neck pain and
28 arm numbness at a local critical care hospital emergency department, notes that Patient Two was

1 currently using alcohol. Respondent continued to prescribe alprazolam, Adderall, and oxycodone
2 for Patient Two through February of 2018.

3 29. Respondent is subject to disciplinary action against his license for unprofessional
4 conduct, in that his failure to effectively monitor the patient's use of a prescribed opiate, a
5 benzodiazepine, and Adderall by periodic toxicology screening, when Respondent was aware of
6 Patient Two's prior, and possibly contemporaneous, alcohol abuse, was a departure from the
7 standard of care constituting gross negligence in violation of section 2234(b) or, in conjunction
8 with the additional allegations herein, repeated negligent acts in violation of section 2234(c).

9 **SIXTH CAUSE FOR DISCIPLINE**

10 **(Gross Negligence/Repeated Negligence—Patient Two)**

11 30. The allegations of paragraphs 21 through 28 above are incorporated by reference as if
12 set out in full. Respondent's license is subject to disciplinary action in that his prescribing of
13 narcotic medication, in combination with the benzodiazepine alprazolam and the amphetamine
14 Adderall for a prolonged period to Patient Two, when Respondent was aware of Patient Two's
15 history of alcohol abuse and of the specific concerns presented by Patient Two's family member,
16 was a departure from the standard of care constituting gross negligence in violation of section
17 2234(b) or, in conjunction with the additional allegations herein, repeated negligent acts in
18 violation of section 2234(c).

19 **SEVENTH CAUSE FOR DISCIPLINE**

20 **(Gross Negligence/Repeated Negligence—Patient Three)**

21 31. Respondent is subject to disciplinary action in that his care and treatment of Patient
22 Three includes departures from the standard of care constituting gross negligence in violation of
23 section 2234(b) or, in conjunction with the additional allegations herein, repeated negligent acts
24 in violation of section 2234(c). The circumstances are as follows:

25 32. Respondent had been treating Patient Three since approximately 1999 for a number
26 of conditions, including HIV, hepatitis C, and depression. Patient Three had long-standing
27 complaints of multiple sources of pain; Respondent had prescribed hydrocodone for Patient
28

1 Three's pain since 2008. Patient Three also informed Respondent that he had a history of
2 amphetamine abuse.

3 33. At the office visit on June 4, 2012, Patient Three complained of pain in his hips,
4 thighs, and ankles. Respondent ordered an MRI to evaluate for possible neurogenic claudication
5 and continued his prescription of hydrocodone for Patient Three's pain. At the July 6, 2012
6 office visit Respondent discussed the MRI results showing Patient Three's severe spinal disc
7 disease; Patient Three rejected Respondent's recommendations that he see a spine specialist and
8 to commence physical therapy. Respondent continued the hydrocodone he was prescribing for
9 Patient Three's pain, and substituted Adderall for the prior amphetamine Patient Three had been
10 receiving from his psychiatrist for symptoms of attention deficit disorder.

11 34. Respondent's chart notes from the office visit on October 3, 2012, indicate that
12 Patient Three told Respondent his pain was inadequately controlled and that he had tried his
13 neighbor's morphine tablets, with greater effect. Respondent prescribed percocet⁹ and one month
14 later began a trial of controlled-release morphine¹⁰ to accompany the hydrocodone already being
15 prescribed to Patient Three. Respondent also continued the Adderall he was now regularly
16 prescribing to Patient Three, ostensibly due to the patient's inability to secure continuing
17 psychiatric care for his attention deficit disorder. At the office visit on February 4, 2013, Patient
18 Three requested refills of his prescriptions for morphine and Adderall and requested a new
19 prescription for oxycontin; Respondent provided these medications as requested.

20 35. On June 4, 2013, Patient Three was hospitalized with multiple stroke symptoms,
21 including garbled speech and tingling bilaterally. Diagnostic imaging showed a small infarct in
22 the brain, indicative of a stroke. The hospital record, included in Respondent's medical record,
23

24 ⁹ Percocet, a trade name for a combination of oxycodone hydrochloride and
25 acetaminophen, is a semisynthetic narcotic analgesic with multiple actions qualitatively similar to
26 those of morphine, a dangerous drug as defined in section 4022 and a schedule II controlled
27 substance and narcotic as defined by section 11055, subdivision (b)(1)(N) of the Health and
28 Safety Code. Oxycodone can produce drug dependence of the morphine type and, therefore, has
the potential for being abused.

¹⁰ Morphine sulfate is a potent opioid analgesic for relief of moderate to severe pain.
Morphine is a dangerous drug as defined in section 4022, a schedule II controlled substance and a
narcotic as defined by section 11055, subdivision (b)(1) of the Health and Safety Code.

1 also contains emergency department notes describing Patient Three's illicit use of
2 methamphetamine.

3 36. Patient Three saw Respondent next on July 4, 2013. Respondent discontinued the
4 prescription for amphetamine, but continued his prescriptions to Patient Three for oxycodone and
5 controlled-release morphine. At the office visit on November 8, 2013, Respondent declined to
6 prescribe amphetamine as Patient Three was requesting, explaining that amphetamine could
7 increase Patient Three's risk of recurrent stroke. On December 10, 2013, Patient Three told
8 Respondent he would obtain amphetamine on the street if Respondent wouldn't prescribe it for
9 him. Respondent stated in his interview with Board investigators that he believed that
10 prescription amphetamine was safer than Patient Three's obtaining drugs on the street, so he
11 prescribed amphetamine to Patient Three on this visit.

12 37. On December 28, 2013, emergency personnel were summoned and Patient Three was
13 admitted to hospital care for diagnoses of pneumonia, sepsis, and myocardial infarction. Despite
14 critical care treatment, Patient Three died soon thereafter.

15 38. Respondent is subject to disciplinary action against his license for unprofessional
16 conduct, in that his failure to effectively refer Patient Three for a psychiatric consultation while
17 prescribing amphetamines to a patient Respondent knew had a history of amphetamine abuse was
18 a departure from the standard of care constituting gross negligence in violation of section 2234(b)
19 or, in conjunction with the additional allegations herein, repeated negligent acts in violation of
20 section 2234(c).

21 **EIGHTH CAUSE FOR DISCIPLINE**

22 **(Gross Negligence/Repeated Negligence—Patient Three)**

23 39. The allegations of paragraphs 32 through 37 above are incorporated by reference as if
24 set out in full. Respondent's license is subject to disciplinary action in that his failure to
25 effectively monitor Patient Three's use of prescribed opiates and amphetamine by periodic
26 toxicology screening, most especially in a patient with an admitted history of amphetamine abuse
27 and who had used controlled substances prescribed to others, was a departure from the standard
28

1 of care constituting gross negligence in violation of section 2234(b) or, in conjunction with the
2 additional allegations herein, repeated negligent acts in violation of section 2234(c).

3 **NINTH CAUSE FOR DISCIPLINE**

4 **(Gross Negligence/Repeated Negligence—Patient Three)**

5 40. The allegations of paragraphs 32 through 37 above are incorporated by reference as if
6 set out in full. Respondent's license is subject to disciplinary action in that his prescribing
7 amphetamine to Patient Three knowing the patient had suffered a recent stroke was a departure
8 from the standard of care constituting gross negligence in violation of section 2234(b) or, in
9 conjunction with the additional allegations herein, repeated negligent acts in violation of section
10 2234(c).

11 **TENTH CAUSE FOR DISCIPLINE**

12 **(Gross Negligence/Repeated Negligence—Patient Four)**

13 41. Respondent is subject to disciplinary action in that his care and treatment of Patient
14 Four includes departures from the standard of care constituting gross negligence in violation of
15 section 2234(b) or, in conjunction with the additional allegations herein, repeated negligent acts
16 in violation of section 2234(c). The circumstances are as follows:

17 42. Respondent first saw Patient Four at an initial office visit on March 30, 2011. Patient
18 Four presented with a complaint of back pain stemming from a lumbar injury with subsequent
19 surgery. Respondent charted a physical exam but no mention is made of a focused examination
20 of Patient Four's back. Respondent continued the patient's pain prescription for oxycodone and
21 alprazolam for the patient's anxiety. Respondent continued this prescribing regimen, with the
22 average morphine milligram equivalent of the oxycodone prescribed of over 500 mg. per day, for
23 the next two and one-half years.

24 43. At an office visit on May 15, 2012, Respondent documents that the patient's pain is
25 well-controlled on the prescribed medications, oxycodone and alprazolam. Respondent's chart
26 notes state that the patient was reluctant to do additional clinical work-up of his back pain and
27 that he was very busy as a cinematographer. After more than two years of refilling this same
28 opiate and benzodiazepine prescription, Respondent had not referred Patient Four to a spine or

1 chronic pain specialist for his pain, nor to a psychiatrist for his purported anxiety. The patient
2 returned approximately every other month over the next 15 months for office visits, at which time
3 his prescriptions for both oxycodone and alprazolam were regularly re-filled. Respondent's
4 records do not reflect any updated physical examinations of Patient Four's back or other
5 clinically-significant information relating the pain for which Respondent was prescribing opiates
6 over a two-year period.

7 44. Patient Four's last visit with Respondent occurred on August 19, 2013. Respondent
8 refilled Patient Four's prescriptions for oxycodone and alprazolam, but noted that he discussed
9 with Patient Four the need for more frequent office visits "considering his pain regimen." Patient
10 Four was also given a copy of Respondent's pain prescribing contract, which he was directed to
11 complete and return. Patient Four died the next day, August 20, 2013. The cause of death was
12 indicated to be accidental acute mixed drug intoxication.

13 45. Respondent is subject to disciplinary action against his license for unprofessional
14 conduct, in that his failure to effectively refer Patient Four to a psychiatrist for consultation
15 regarding his complaint of anxiety and to a spine or chronic pain specialist for the patient's
16 lumbar spine pain, for which conditions Respondent prescribed alprazolam and oxycodone over
17 the course of two and one-half years, was a departure from the standard of care constituting gross
18 negligence in violation of section 2234(b) or, in conjunction with the additional allegations
19 herein, repeated negligent acts in violation of section 2234(c).

20 **ELEVENTH CAUSE FOR DISCIPLINE**

21 **(Gross Negligence/Repeated Negligence—Patient Four)**

22 46. The allegations of paragraphs 42 through 44 above are incorporated by reference as if
23 set out in full. Respondent's license is subject to disciplinary action in that his failure to
24 effectively monitor Patient Four's use of prescribed opiate and benzodiazepine by periodic
25 toxicology screening was a departure from the standard of care constituting gross negligence in
26 violation of section 2234(b) or, in conjunction with the additional allegations herein, repeated
27 negligent acts in violation of section 2234(c).

28 ///

1 **TWELFTH CAUSE FOR DISCIPLINE**

2 **(Gross Negligence/Repeated Negligence—Patient Four)**

3 47. The allegations of paragraphs 42 through 44 above are incorporated by reference as if
4 set out in full. Respondent's license is subject to disciplinary action in that his prescribing of very
5 high doses of an opiate to Patient Four, in combination with a benzodiazepine, was a departure
6 from the standard of care constituting gross negligence in violation of section 2234(b) or, in
7 conjunction with the additional allegations herein, repeated negligent acts in violation of section
8 2234(c).

9 **THIRTEENTH CAUSE FOR DISCIPLINE**

10 **(Failure to Keep Adequate Medical Records—Patient Four)**

11 48. The allegations of paragraphs 42 through 44 above are incorporated by reference as if
12 set out in full. Respondent's license is subject to disciplinary action in that his failure to maintain
13 adequate and accurate medical records of his care and treatment of Patient Four constitutes
14 unprofessional conduct by application of section 2266.

15 **FOURTEENTH CAUSE FOR DISCIPLINE**

16 **(Gross Negligence/Repeated Negligence—Patient Five)**

17 49. Respondent is subject to disciplinary action in that his care and treatment of Patient
18 Five includes departures from the standard of care constituting gross negligence in violation of
19 section 2234(b) or, in conjunction with the additional allegations herein, repeated negligent acts
20 in violation of section 2234(c). The circumstances are as follows:

21 50. Patient Five's initial visit with Respondent was on June 4, 2014. Patient Five was
22 reportedly seeking a new physician to treat his long-term pain, which had been diagnosed as
23 pudendal neuropathy. The patient stated his pain was not adequately controlled by the
24 oxycodone and gabapentin¹¹ he had been prescribed by his prior treating physician. Respondent
25 noted Patient Five's related history of depression and alcohol abuse, requested that Patient Five

26
27 ¹¹ Gabapentin (trade name Neurontin) is an antiepileptic indicated as adjunctive therapy in
28 the treatment of partial seizures with and without secondary generalization in adults with
epilepsy. It is a dangerous drug within the meaning of Business and Professions Code section
4022.

1 review a pain contract and obtain his prior medical records, and asked Patient Five to return in
2 one week.

3 51. At the next office visit on June 13, 2014, Respondent noted the patient's contention
4 that his current prescription for 90 mg. of oxycodone per day was insufficient to control his pain;
5 Respondent increased the oxycodone dose from 90 mg. to 120 mg. per day. A signed
6 pain/prescription contract and informed consent are included in the record of this office visit.

7 52. On the third office visit with Respondent on June 26, 2014, Patient Five complains
8 that his pain is still not adequately controlled; Respondent added a fentanyl patch¹² and increased
9 the dosage of oxycodone. Patient Five is seen again on June 29, 2014, and a CT scan report
10 showing an enlarged prostate is noted. Respondent referred Patient Five for a urological consult.
11 At the office visit on October 15, 2014, Patient Five informed Respondent he did not wish to
12 undergo the surgery recommended by the urologist. Patient Five also requested an increase in the
13 dosage of his oxycodone, which Respondent then prescribed. Three weeks later Patient Five
14 reported that his oxycodone had been stolen; Respondent wrote a prescription for the remainder
15 of the month's supply of oxycodone.

16 53. Respondent referred Patient Five for a neuropsychology consult in response to the
17 patient's complaint of memory problems. At the office visit on January 31, 2015, Patient Five
18 told Respondent that he was having additional pain. Respondent planned a work-up of this pain
19 complaint, including an MRI. Respondent noted that Patient Five had increased his daily dose of
20 oxycodone from six tablets to eight; Respondent speculated that Patient Five's memory
21 impairment issue could be related to the medications he was taking. Respondent increased the
22 dose of oxycodone he was prescribing to match Patient Five's recent, self-determined increase in
23 his oxycodone dose.

24
25 ¹² Fentanyl transdermal system goes by the trade name Duragesic. Fentanyl is an opioid
26 analgesic, and a dangerous drug as defined in section 4022 and a schedule II controlled substance
27 as defined by section 11055 of the Health and Safety Code. Duragesic is a strong opioid
28 medication and is indicated only for treatment of chronic pain (such as that of malignancy) that
cannot be managed by lesser means and requires continuous opioid administration. Duragesic
presents a risk of serious or life-threatening hypoventilation. Duragesic can produce drug
dependence similar to that produced by morphine and has the potential for abuse.

1 54. Patient Five's MRI results were included in the medical record of the March 24,
2 2015, office visit; the report showed impingement in the lumbar 4-5 spine. The patient stated his
3 pain was being adequately controlled at his current dosage of oxycodone and fentanyl. No back
4 examination nor recommendations for addressing the diagnosed lumbar impingement were
5 documented at this visit.

6 55. A consulting gastroenterologist recommended Patient Five undergo anorectal
7 manometry to additionally diagnose his abdominal pain. Notes from the July 10, 2015, office
8 visit reflect Patient Five's refusal to undergo the procedure. Respondent recommended a consult
9 with a neurological surgeon for Patient Five's lumbar pain; there is no subsequent documentation
10 that such a consult took place. Respondent continued to prescribe oxycodone and fentanyl for
11 Patient Five at monthly intervals.

12 56. At the May 25, 2016, office visit, Patient Five asked Respondent to prescribe
13 transcranial magnetic stimulation treatment for depression. Although Respondent documented
14 that he informed Patient Five that he was not familiar with this modality of treatment, Respondent
15 wrote Patient Five a prescription for a transcranial magnetic stimulation machine. Respondent
16 did not document a referral for a psychiatric consult prior to, or in conjunction with, the
17 prescription for the transcranial magnetic stimulation device. Respondent continued to prescribe
18 oxycodone and fentanyl to Patient Five at the same high dosage levels without documenting
19 clinical confirmation of the need for prescribing this high level of opioid medications.

20 57. Respondent is subject to disciplinary action against his license for unprofessional
21 conduct, in that his failure to effectively monitor Patient Five's use of prescribed opiate and
22 benzodiazepine by periodic toxicology screening was a departure from the standard of care
23 constituting gross negligence in violation of section 2234(b) or, in conjunction with the additional
24 allegations herein, repeated negligent acts in violation of section 2234(c).

25 **FIFTEENTH CAUSE FOR DISCIPLINE**

26 **(Failure to Keep Adequate Medical Records—Patient Five)**

27 58. The allegations of paragraphs 50 through 56 above are incorporated by reference as if
28 set out in full. Respondent's license is subject to disciplinary action in that his failure to maintain

1 adequate and accurate medical records of his care and treatment of Patient Five constitutes
2 unprofessional conduct by application of section 2266.

3 **SIXTEENTH CAUSE FOR DISCIPLINE**

4 **(Gross Negligence/Repeated Negligence—Patient Five)**

5 59. The allegations of paragraphs 50 through 56 above are incorporated by reference as if
6 set out in full. Respondent's license is subject to disciplinary action in that his prescribing of very
7 high doses of opiates over a period of years was a departure from the standard of care constituting
8 gross negligence in violation of section 2234(b) or, in conjunction with the additional allegations
9 herein, repeated negligent acts in violation of section 2234(c).

10 **SEVENTEENTH CAUSE FOR DISCIPLINE**

11 **(Gross Negligence/Repeated Negligence—Patient Five)**

12 60. The allegations of paragraphs 50 through 56 above are incorporated by reference as if
13 set out in full. Respondent's license is subject to disciplinary action in that his prescribing of a
14 transcranial magnetic stimulation device to Patient Five without adequate knowledge of that
15 modality of treatment and without referring the patient for a consultation with an appropriate
16 specialist was a departure from the standard of care constituting gross negligence in violation of
17 section 2234(b) or, in conjunction with the additional allegations herein, repeated negligent acts
18 in violation of section 2234(c).

19 **PRAYER**

20 WHEREFORE, Complainant requests that a hearing be held on the matters herein alleged,
21 and that following the hearing, the Medical Board of California issue a decision:

22 1. Revoking or suspending Physician's and Surgeon's Certificate Number G 61254,
23 issued to Guido James Gores, Jr., M.D.;

24 2. Revoking, suspending or denying approval of Guido James Gores, Jr., M.D.'s
25 authority to supervise physician assistants and advanced practice nurses;

26 ///

27 ///

1 3. Ordering Guido James Gores, Jr., M.D., if placed on probation, to pay the Board the
2 costs of probation monitoring; and

3 4. Taking such other and further action as deemed necessary and proper.
4

5 DATED:

6 May 8, 2019

KIMBERLY KIRCHMEYER
Executive Director
Medical Board of California
Department of Consumer Affairs
State of California
Complainant
